1. Contact Us

Please start by contacting your JMI Sales Representative to be put on the recycling schedule, your representative can be found on the below map. We will need to know the location address, number of sections, type of material to be recycled, and when the material will be ready to be processed for recycling.

2. Preparing your Covers for Recycling

- If applicable, please remove your Cover Guard® Internal Strapping from the cover, this should be shipped to JMI separately.
- For round bunkers with a yoke, remove yoke from main body, as we currently do not have the ability to recycle Vinyl PVC.
- HLT® Rain Flaps can be left attached to the cover sections.
- Place covers in an accessible location for recycling equipment to access (covers should be stored in a reasonable fashion, away from mud holes, etc).

3. Bailing Process

Once your cover is ready to be recycled JMI will arrange for our equipment to travel to your location to begin the bailing process. Once the material is baled we will weigh each bale, label, and stack them in your staging area. JMI will arrange for pickup and shipping of bales.

4. Pickup and Shipping

Once the bailing process is complete our recycling team will contact JMI Logistics with details of the load and arrange the pickup of your material. A bill of lading and call tag will be issued and sent to your sales representative. At this time the representative will then forward with details of the pickup. Please use the furnished bill of lading at time of pickup. Customer will be responsible for loading the truck. No pallets are required for shipment. The bales can go straight onto the trailer.

5. Invoicing

After shipping process is complete JMI will generate a sales order with the final cost associated and submit to customer for a purchase order number in order to generate an invoice.
