## PLM Implementation

All implementation services use our proven implementation methodology to ensure success in meeting your needs.

## Design Services

We can work on your site or remotely, to meet your needs. Whether you require fully qualified Professional Engineers, FEA experts or simply need CAD operators we can match our expertise to your exact needs. As a Designfusion client you can leverage our expertise in a wide range of disciplines including manufacturing, analysis, Information technology and generative design.

### Training

Our dedicated training group delivers standard training programs as well as customized training and mentoring for the entire Siemens PLM Software product lineup.

## CAM Services

The services we offer include:

- NX CAM Programming Services
- Post processor and Sim kit development
- NX Training and Mentoring
- Manufacturing Efficiency Evaluations

## Customization and Automation Services

A simple minor customization of your CAD, CAM or CAE application and automation of your repetitive manual procedures could save up to 95% of your time and have a tremendous impact on your productivity.

## Online Training

- On demand courses with 24/7 access
- Self paced to create no unnecessary disruption to workflow
- Created by a Designfusion Certified Trainer

### Part Production

We will have your parts in hand 5 business days from an order submission. We can handle small jobs and high capacity projects.
