MEZZANINE
200 SERIES

PRODUCT OVERVIEW

The Mezzanine 200 Series enables real-time collaborative content-sharing and interaction, creating a data-rich environment that engages teams in the work at hand. Purpose-built for small- to medium-sized spaces and the teams that work in them, Mezzanine 200 delivers powerful capabilities previously available only in larger meeting rooms. Create a dynamic working environment with two displays and control content using Mezzanine's spatial tracking system. Mezzanine 200 is powered by an in-room appliance and is equipped with an optical tracking system.

BENEFITS

Decide using all your data: Enable multiple streams of content providing shared context for higher quality, more efficient decision making.
Meet from anywhere: Provide multi-directional content sharing, allowing anyone to connect and contribute from anywhere—in-room, a remote room, or on the go.

Engage the power of teams: Facilitate easy, instantaneous sharing of any device, leading to more engaging, more productive meetings.

Ease of use: Start your meeting with a one-click dial from an integrated calendar. Bring your own device and integrate your existing communication and collaboration tools to start working from day one.

MEZZANINE 200 ROOM

Create a dynamic working environment with two displays and multiple configurations to match the needs of any organization. Control content using Mezzanine's spatial tracking system and wand. Or share your screen with the Mezzanine app.
