

FEATURES & BENEFITS

Looks Good. Protects Better.

The hallmark of the Castia Stone siding system is the “rainscreen” design which allows proper moisture drainage and ventilation. When installed properly, the Castia Stone siding system will deflect any moisture directed at the building. If moisture does penetrate the siding, it will be channeled directly outward, thanks to Castia Stone’s innovative bracketing system that creates a continuous ½” gap between the siding and the actual structure. This air space prevents trapped moisture, which can lead to dry rot and mold.

Trapped moisture is the leading cause of structure failure. Other products, like stucco, wood siding and natural stone, do not feature space for venting and draining. Moisture may not only enter from the outside, but condensation from inside may also migrate from the building interior and become trapped between the structure and exterior façade. The Castia Stone siding system allows any moisture that travels through the walls to vent outwards. Pre-cast stone has been used in construction for hundreds of years with proven strength and durability. Castia Stone is manufactured to withstand the abuse of natural elements such as rain, hail and ultraviolet rays.

The “Rainscreen” Advantage

The Castia Stone Advantage.

The advantages to Castia Stone are many. We give you a wide selection of accessories, including fluted columns, and our designs were created to reflect an old-world elegance. Castia Stone is easy-to-install, environmentally friendly and protects your home with a unique rainscreen technology.

- Exterior stone surface is coated with a clear, water-repellant sealer
- Color permeates throughout the stone
- Designed to be flexible to prevent cracking and mortar problems
- Innovative bracketing system is easy to install, saving time and labor
- Increases the value of your home
- Limited Lifetime Warranty

LEFT: With Castia Stone, your entryway can speak volumes of elegance and classic style.
