

Will Your Business Make a Pledge or two?

.....

We are calling on all businesses to make a pledge to take action on the Climate Emergency

As the pressure on businesses mounts Merton Chamber of Commerce and Sustainable Merton are asking businesses to make pledges for action.

We are asking businesses to make up to 5 pledges. Just choose the ones that are relevant to you where you think you can make a difference. Contact us to find out more about the support available.

Action on Waste	Some of the support available
Separate general waste from recycling and organise separate collections	First Mile offers a range of recycling services that covers all your business waste and collection needs. Nothing goes to landfill. www.Thefirstmile.co.uk
Provide bins in your premises for food waste and organise for this to be collected	First Mile offers a range of recycling services that covers all your business waste and collection needs. Nothing goes to landfill. www.Thefirstmile.co.uk
Recycle packaging – flexible and bubble wrap	First Mile offers a range of recycling services that covers all your business waste and collection needs. Nothing goes to landfill. www.Thefirstmile.co.uk
Action on Water	
Set up refill stations in your premises to avoid plastic bottles and plastic cups	Contact Sustainable Merton to find out more about Refill Merton www.sustainablemerton.org
Action on Air Quality	
Introduce an active travel plan for your business – encouraging use of public transport, cycling, walking and less use of cars	Sustrans is a charity that is working to make it easier for people to walk or cycle www.Sustrans.org.uk

Action on Energy	
<p>Undertake an energy audit for your business</p>	<p>CREW is a community-led non-profit group focused on overcoming the challenges businesses find in developing a sustainability model. We help accelerate London on the journey to a low carbon, sustainable future.</p> <p>CREW has experience of delivering retrofit projects that help businesses undertake energy-saving initiatives, that they would otherwise lack the experience, skill, capacity and finance to undertake individually. This has resulted in operating cost savings, available to recycle into direct service delivery, as well as saving carbon emissions.</p> <p>www.crewenergy.london</p>
