

DATA INTEGRATION PLATFORM

Data Sources + Targets

Making the Digital Lab a reality requires connecting ALL the contributing instruments, pieces of equipment, software, vendors, etc. [Contact us](#) for the most up-to-date list or to inquire about specific vendors or models. We won't rest until every lab data source and target are connected.

DATA SOURCES

Instruments + software

Blood Gas Analyzers
Bioreactors
Capillary Electrophoresis
Cell Analyzers
Chromatography
Filter Screening Systems
iCE Systems
Mass Balances
Mass Spectrometers
Metabolic Analyzers
Osmometers
Plate Readers
Shaking Incubators
SPR Systems
TFF Systems

ELNs, LIMS, historians

Compound Registers
ELNs
Historian
Inventory Systems
LIMS
SDMS

File & data storage

Box
Databases
Data Warehouses
Egnyte
Windows File Share

CRO/CDMO files

Batch Report
DDI
DMPK
Log-D
Metabolic Stability
Permeability
Protein Binding
Solubility

IoT devices

Dissolution
Mass Balances
pH Meters

Sensors

CO2
Doors Open
Dry Contact
Humidity
Light
pH
Temperature
Water Leakage

TETRASCIENCE

TetraScience is the leader in transforming the Digital Lab. We provide an advanced data engineering solution that makes life sciences R&D data truly accessible and actionable. More than 80 leading pharmaceutical and biotech companies rely on our cloud-native Data Integration Platform and applications to automatically centralize and harmonize their experimental data, preparing it so you can focus on value-add activities like data science and AI, trend identification, and anomaly detection and response. Activate the flow of your data.
