

AlertLog™ is your ultimate Fire Alarm Management tool

Whether you are responsible for a single Fire Alarm System or a growing portfolio of varied systems, AlertLog™ puts you firmly in control.

AlertLog™ automatically stores every event on your Fire Systems to a cloud based web-portal where all information can be accessed and reviewed via your web browser.

AlertLog™ benefits:

- ✓ Alerts relevant members of staff to any system event via e-mail and/or text messaging.
- ✓ Accumulates evidence of weekly testing activity including actual device(s) tested on each test.
- ✓ Print reports and demonstrate compliance to inspecting authorities.
- ✓ Facilitates system reviews to analyse activations and fault conditions.
- ✓ Audit your Fire Alarm providers' performance. Is maintenance/commissioning being carried out correctly?
- ✓ Unlimited log – there is no limit to the amount of system activity you can store and interrogate.
- ✓ Provides dynamic device asset register for budgeting and life-cycle reports.
- ✓ Scalable, flexible and completely configurable.
- ✓ Simple retrofit installation and no phone line required!
- ✓ Utilises GPRS network. Ethernet connection available as option.
- ✓ Compatible with most Analogue Addressable Fire Alarm Systems.
- ✓ Can be connected to Conventional Fire Alarm Systems to report basic system activity.

Product Part Nos	Description
