"With a battery on Amber,
you can make a lot of money
and it's great fun. When you
get the bill you can just look
at that and smile."

Gareth Jones

Amber customer in the Ausgrid region since October 2022

TIMELINE

"With my previous retailer Diamond Energy I was up by something like \$6 in credit over a three month period.

"In the first month of Amber before adding Smartshift and joining the Ausgrid two-way tariff, things were pretty good. Once SmartShift and the Ausgrid trial tariff kicked in I've been up by around \$200 each month since then, so it's been really good.

"The fact you can actually make decent money during sunlight hours is excellent. I've been telling all my family and friends about it."
