

# Product Catalogue 2018

## **Making rust a distant memory, one anode at a time**

If you know your anodes, you know your next visit from corrosion is only a matter of time.

Anodes Australia, is committed to making that the least of your worries by ensuring you have access to high-quality anode solutions as and when you need them. Servicing a host of industries with world-class galvanic anodes is what we do best.

If you operate in one of the following industries you can depend on us to keep corrosion at bay and rust a distant memory:

Plumbing

Caravan industry

Marine

Mining – oil & gas

Engineering

# Our 4 pillars of performance

## Price

Our prices are kept competitive so when you receive your quote we'll forgive you for giving yourself a pat on the back for making the smart choice.

## Product range

If there's something you need, we'll have it. Our extensive range is designed to give you the freedom of choice rather than be limited to a few select options.

## Professional advice

We wouldn't give advice that we wouldn't follow. You can rely on our team of qualified technicians to give you the professional advice how and when you need it - free of charge.

## Personal service

Our success is defined by the simplicity of the solutions we provide which is why we take the time to work with you personally. Trust Anodes Australia for personal service that provides simple solutions for a simpler life.

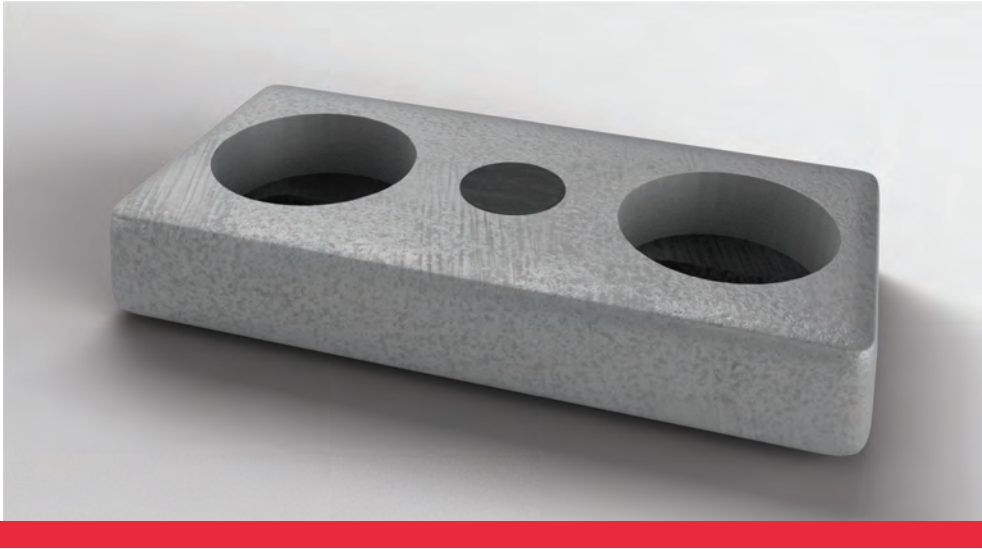

## Magnesium

Effective soft water anodes, found in the majority of tanks Australia wide and also the fresh water rivers.

**If it's an anode solution, we probably have it**

Magnesium anodes are available in an extensive range of sizes and shapes, and are ideally suited for water tanks and steel anti-corrosion application.

## Magnesium Block Anodes

### Size

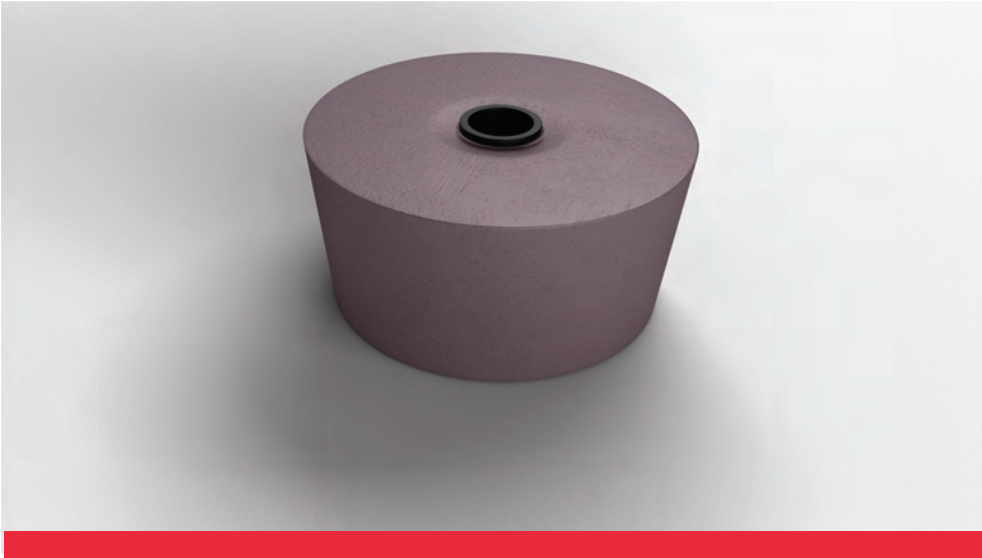

200x100x30mm  
 1500x65x65mm  
 300x150x30mm  
 300x150x50mm  
 350x150x35mm

## Aluminium

Highly resistant to hard water and perfect for hard water applications and old tanks.

**If it's an anode solution, we probably have it**

Aluminium anodes are available in an extensive range of sizes and shapes, and are suited for hard water low resistivity applications.

## Aluminium Block

## Zinc

Effective in salt water applications such as marine conditions but also effective in mining applications too.

**If it's an anode solution, we probably have it**

Zinc anodes are available in an extensive range of sizes and shapes, and are ideally suited for salt water and marine and boating applications.

## Zinc Block

### Size

600x144x67mm  
 100x38x25mm (with core 190x18x2mm, GW 0.74kg, NW 0.68kg)

## Setting the standard for simple & effective anode solutions

While we break the mould by continuously seeking out ways to keep our service superior to the rest of the market, we always comply with Australian Standards AS2239-2003, specifically relating to the galvanic anodes for cathodic protection. It's this minimum standard of performance that has led to the demand of our sacrificial anodes across Australia and Asia.

**We look forward to helping you fix your problem sooner than later**
