

ENVIRONMENTAL POLICY

Flowrite Group is committed to deliver their projects in an environmentally responsible way, from inception to completion.

Our team is committed to prevent excessive pollution, and understands the company has a role in the protection of the environment, to the extent to which we can control it

Flowrite's management team strive for this by:

- Considering the needs and expectations of interested parties, and complying with all relevant statutory duties, codes, standards and contractual requirements
- Establishing environmental objectives in alignment with project risk, and industry best practice
- Understanding the exposure to environmental risk at each phase of a project, and implementing processes and procedures to identify, prevent, and mitigate undesirable environmental impacts
- Applying the appropriate evaluation techniques for enhancing continual improvement, with the benefit of learnings from historical challenges

This Environmental Policy will be communicated to all Flowrite employees, to ensure we collectively have an understanding of the environmental objectives of the business

Jeff Giebel (Managing Director)
