

Multiple chronic care needs. One virtual care approach for your employees.

Personalized virtual care to drive results

Onduo helps deliver optimal care for your employees—and cost savings for you—with digital and connected interventions that provide convenient support for your employees when they need it.

.....

The fact that someone takes the time to ask and answer questions about what is going on with my condition makes all the difference. It almost creates a sense of not wanting to let my coach, the team, or the company down. Thanks to Onduo and my coach for changing and possibly saving a life.

Craig, Age 61

Our virtual care model gives you one solution across multiple conditions:

- > Type 2 diabetes
- > Weight management
- > Hypertension
- > Diabetes prevention
- > Behavioral health (2021)
- > Additional conditions added in 2022

...and all supported by a set of key wellness services to enable a “whole person” health approach.

- > Diet
- > Exercise
- > Medication adherence
- > Mental + behavioral wellbeing
- > Sleep

Our core differentiators allow us to personalize care for each of your employees.

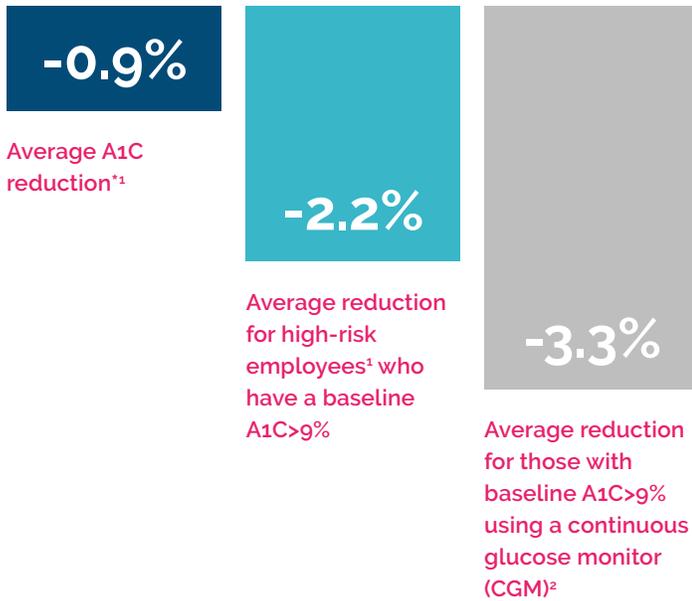

- > Novel sensing devices enable remote monitoring and care at home
- > Personalized care pathways—by condition needs and employee goals
- > Digital and connected interventions
- > Dedicated Coaches and Care Leads
- > Specialty physician access through telemedicine to extend care to the home and help optimize medication management

Leveraging the best in research and innovation

Onduo, a Verily company, works to understand your employees and influence meaningful change through its science-backed, continuous-learning approach.

The Onduo digital phenotyping engine, which incorporates behavioral science, user experience and predictive analytics, helps transform care delivery and personalize the care experience for each of your employees based on the clinical and engagement needs we identify. Onduo's outcomes with our Type 2 diabetes solution demonstrate the potential cost savings for you and positive impact for your employees:

Let's talk about how Onduo virtual care can deliver the best employee experience and optimal outcomes for you.

^{*} Average reduction for employees with a baseline A1C>7% and not at ADA treatment target

Engaging your employees. Driving change.

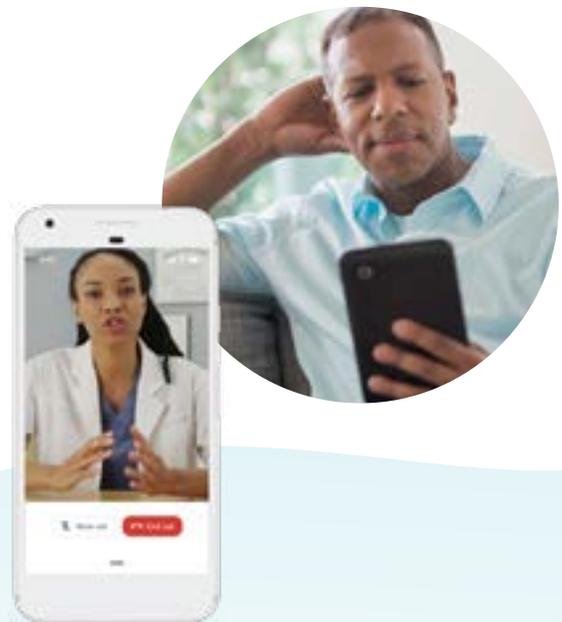

Onduo participants give us a net promoter score (NPS) of 78—higher than many of the brands your employees may use and enjoy daily. That helps us keep your employees engaged and working toward their health improvement goals.

Participants in our weight-loss program lost

Onduo has given me the tools, instruction and motivation to investigate this condition within myself, and discover areas I could reasonably improve, monitor, and adjust to a degree to make sustainable changes in my life.
