

hh2 Human Resources

Employee Records

hh2 Human Resources automates the most common, time-consuming HR related tasks that a construction company is faced with on a daily basis. You can store employee-related data in just one location and access it from anywhere. Give your employees access to their files through a self-service portal where they can submit changes of address, download pay stubs, view employee and company documents and update their training and certifications. With multiple levels of security, you can know your data is safe while giving your employees access to the important data they need.

Seamless Integration

Native Apps for
iOS & Android

Supports all Major
Web Browsers

Access Pay Stubs
in an Instant

Loaded with
HR Features!

An Affordable Solution

You don't need to spend a fortune for an expensive HR package to keep all your employee information stored in one easy-to-access place. Reduce costs

associated with your server and IT by turning your web browser into a powerful employee management tool that resides in the cloud.

Control Access

Control who accesses your HR data with hh2 Human Resources. Give your field managers access to data that is available instantly on the jobsite with the Job/Crew Dashboard. Provide your employees with access to paystubs, emergency contacts, benefits information and a host of additional HR data with My Records.

Manage Like A Pro

Enterprise Management offers all the features you need to quickly see the HR data for your entire organization. In a few quick clicks, you can view and make adjustments to reports for classifications, certifications and benefits for all the employees in your organization.

My Records

Give your employees easy access to their important HR information with hh2 My Records. Your employees can quickly find their pay stubs, access company documents, review certifications, check on sick and vacation time and have access to view the benefits they are enrolled in. My Records is available from any web browser and from apps that are developed to work for iOS and Android.

Documents in the Cloud

Store and roll out a wide variety of important HR documents on an employee level or send them to every employee throughout your organization with the "Document Library."

Provide quick access to employees and managers for documentation like employee resumes, offer letters and license information. Roll out documents on a global level with newsletters, important benefit information and other vital HR documentation.
