

In our own words...

"Management sincerely cares..."

"Premier is an amazing place to start AND continue your career. Internal work and client work consistently build upon your skill set, enhancing your ability to make meaningful contributions to the team. Management sincerely cares about employee happiness and personal development—with the intent and desire for you to stay at the company for a long time."

– Victoria B., BS Mathematics / French and Francophone Studies
Davidson College, 2018

"...rewarding to bring success to our clients..."

"It's very rewarding to bring success to our clients who were struggling before using our services, who then work with us on multiple projects over the subsequent years while referring us to their colleagues and friends, too."

– Matthew P., BA Economics
Northwestern University, 1999

"...people who care about your success..."

"I can honestly say I like showing up every day. I can also say my coworkers are my friends. Not many people can say that in today's culture. Having a group of people who care about your success and you as a person is invaluable. This has been critical to my development in more ways than I can measure."

– Nicole A., BS Mechanical Engineering
University of Illinois at Urbana-Champaign, 2017

"...still here 15+ years later..."

"When I first interviewed with Premier International, one of the things that impressed me the most was the fact that so many employees joined the team right after college and were still here 15+ years later."

– Nick G., BS Mechanical Engineering
Trinity College, 2013

"...in-depth mentoring program..."

"I was immediately given ownership of several key aspects of a project. As a result, I quickly learned about the field of data migration and my client's industry. Combined with the in-depth mentoring program, I cannot imagine anywhere else that would foster my growth as much as Premier has."

– Jackie C., BS Bioengineering
University of Illinois at Urbana-Champaign, 2018

"...an awesome experience..."

"Data is fascinating in that it is both the solution and cause of many business problems. Data migration is traditionally an activity that causes organizations a large amount of pain. Helping organizations avoid this pain is an awesome experience."

– Steve N., BS Computer Science
Butler University, 1999

"...incredibly rewarding..."

"Helping organizations successfully navigate all the complexities and issues that plague implementation is an incredibly rewarding experience."

– Kate M., BS Biomedical Engineering
Northwestern University, 2001

"...extremely inspiring..."

"Working as part of a team that puts client success at the forefront of everything we do is extremely inspiring and rewarding."

– Nic O., BS Industrial Engineering
Northwestern University, 1995

"...opportunity to travel internationally..."

"I've been afforded the opportunity to travel internationally, own development/manage deadlines on multiple projects at once, as well as to be involved in recruiting, sales, and the company's growth plan – all within my first two years. On top of that, the family atmosphere cultivated by senior staff makes Premier such an outstanding place to work."

– Luke S., BS Informatics
Indiana University, 2014

"...people genuinely care about each other..."

"Great career – great people. The senior staff has instilled a sense of family throughout the organization. People genuinely care about each other, co-workers selflessly jump in to help in emergencies, and of course we go out together to celebrate our professional and personal successes. It has become a second family to me."

– Nick V., BS Aerospace Engineering
University of Illinois at Urbana-Champaign, 2013

"...most of my time in Chicago..."

"I've had several trips to Europe as well as several in the U.S. I spent a weekend in Switzerland unwinding with three of my team members after a successful week in England. As cool as those experiences have been, it's great that I still spend most of my time in Chicago, which is unlike other consultants I know who are away from their homes every week."

– Jim Q., BS Aerospace Engineering
Notre Dame, 2010

"...surrounded by experienced colleagues..."

"Being a Premier consultant has allowed me to grow my project management skills and my technical knowledge. Because I'm surrounded by experienced and collaborative colleagues, I feel confident tackling whatever challenges a project may present."

– Shelby L., BS Computing and Applied Mathematics, BS Computer Science
Saint Mary's College, 2017
University of Notre Dame, 2018

"...even better than promised..."

"The opportunities have been even better than promised. I first visited a client office just four weeks after training. In my first 2 ½ years I had three clients across the U.S. in three different industries – a global furniture manufacturer that was consolidating data after several corporate acquisitions, a well-known manufacturer of high-end blenders implementing new financial software, and a global aerospace manufacturer that was consolidating manufacturing data from their worldwide operations. I didn't get 'shuffled' around between projects – I saw my portions through to successful completions."

– Marcus B., BS Aerospace Engineering
University of Notre Dame, 2013

"...amazing family culture here..."

"Choosing Premier has been one of the most rewarding decisions I've ever made. There's an amazing family culture here, coupled with a supportive work environment. As soon as my training was complete, I was paired with a project mentor and a career development mentor."

– Frank O., BS/MS Biomedical Engineering
Northwestern University, 2018

"...great support system to me..."

"Premier has provided me with numerous opportunities to enhance and expand my skill set. The staff at Premier have been a great support system for me, both professionally and personally."

– Athena M., BS Bioinformatics
Loyola University Chicago, 2014

"...work at a much higher level..."

"Applaud is much more intuitive than the programming languages I learned in school. You work at a much higher level and development is much faster, so you spend most of your time on consulting activities."

– Rachel S., BA Mathematics
State University of New York – Binghamton, 2013
