

## What We Are Doing to Keep You and Our Team Safe

We are excited to have the opportunity to welcome you back! Our office has always utilized personal protective equipment (PPE) that has exceeded all the CDSBC guidelines, however, in light of the COVID-19 Pandemic we have instituted additional guidelines and protocols to ensure your safety.

You will see many changes, as we have new ways of scheduling your appointments and managing your insurance and financial transactions. First, you will be contacted 48-72 hours prior to your appointment via phone or email and asked a set of health-related questions. It is required that we complete this questionnaire prior to your appointment. **We will have to reschedule your appointment if we are unable to complete this step.** Below is a list of some of the enhanced precautions we have taken to protect you in addition to extensive team training on infection control and patient management procedures.

1. Personalized arrival procedures to guide you from your car directly to treatment rooms to eliminate contacting surfaces.
2. Maintain distancing in the reception area for essential caregivers and parents of minors if they cannot wait in a vehicle or outside the clinic.
3. Removed magazines and items that can harbor or transfer germs of any kind. Hand sanitizers will be positioned throughout the clinic.
4. Providing more education materials to enhance your awareness of health issues related to this pandemic.
5. We require a mask to be worn by ALL patients upon entering the office. Either cloth or medical mask will suffice.
6. Installed sneeze guards or droplet barriers at all reception areas.
7. Require hand washing or hand sanitizing before and after all appointments by our team and by our patients.
8. Introduce an oral pre rinse by all patients to reduce exposure to germs.
9. Record temperature of every patient upon entering the office.
10. Record the temperature and lung efficiency of every team member each day at beginning of work period.

11. Enhanced operatory disinfection procedures of all surfaces between patients.
12. Ambient air management with medical grade HEPA air filtration units to remove germs from circulating air.
13. Enhanced operatory disinfection procedures with a fogging device to access hard to reach places that can be easily missed.
14. New personal protection equipment like visors, gowns, and masks for our doctors and team to provide barriers against the smallest of germs.
15. Introduce protocols to reduce or eliminate airborne aerosols during all dental procedures.
16. Enhanced nightly disinfection procedures of equipment and office fixtures like computers, keyboards, telephones, tablets, chairs, doorknobs, and buttons that may be touched unconsciously.
17. Disinfection of all outside mail and packages that enter the building.
18. Longer appointment times for you to prepare and complete all appointment tasks and duties in the safest and most comprehensive manner.

We look forward to serving our patients again in this unique time.
