

EleVia Electronic Invoicing for Deltek Vision®

SPEED CASH FLOW AND SUPERCHARGE PROJECT PERFORMANCE

Now there's a way to automate your traditionally complex invoice review process. EleVia Electronic Invoicing streamlines the process to shorten your billing cycle and increase cash flow — while giving you the insight to improve project performance.

SPEED APPROVALS TO SPEED BILLING

EleVia Electronic Invoicing acts as a communication hub, eliminating the need to send physical documents back and forth between Accounting and Operations. Once Accounting generates a draft invoice in Deltek Vision®, reviewers are automatically notified via email that they can mark-up and approve the invoices online — even remotely.

KNOW THE STATUS OF EVERY INVOICE

Accounting gains the ability to see the status of every invoice at any time. You can even program automatic alerts to remind reviewers who haven't approved invoices within a few days.

GAIN PERFORMANCE INSIGHT

The software's dashboard lets authorized Project Managers see a snapshot of all their jobs for the month. They can review job-to-date information, track variances and identify trends that need addressing — to improve utilization and profitability.

ADDITIONAL MODULES FOR GREATER FUNCTIONALITY

If your clients require extensive documentation with their invoices, you can use the built-in Final Invoice Packaging module to automatically assemble all required documentation with final invoices. We also offer an optional Transactions module that allows project managers to request holds, write-offs and transfers directly in Deltek Vision — to save time.

GET MORE VALUE FROM YOUR DELTEK VISION INVESTMENT

EleVia Electronic Invoicing helps you extend the power of Deltek Vision. We designed it specifically as a Vision add-on product, so it integrates seamlessly and is intuitive for users. That means you can start leveraging the added functionality right away — for greater efficiency and financial visibility.

HOW ELEVIA ELECTRONIC INVOICING WORKS

About EleVia Software

We're a Central Consulting Group company that develops, delivers and supports software to extend the value of the Deltek Vision ERP system for architecture, engineering and professional service firms. Our products elevate and enhance key financial and operational processes — giving you valuable insight into project performance and profitability.
