

Vacancy: DevOps Engineer

Do you want to focus on managing software and on developing? If you are a technical proactive DevOps Engineer who likes to enhance our software, improve stability and perform technical testing, then we are looking for you!

You will be based in Amsterdam and will be joining a high performing team who work closely together and have their own expertise and focus.

As a link between development and the manager operations, it is your main task to act as a hands-on 'Jack of all trades'. You are in charge of all incoming tickets and making sure, you resolve them by yourself (bugfixing). Also testing and further developing the software belongs to your tasks.

In this role, you will:

- Be the link between development and the manager operations, supporting both. You will analyse, consult and define requirement specification, to clarify requirements before producing functional specifications for the development team;
- Be working proactively and independently on analyzing as well as fixing errors and bugs in processes or products;
- Make sure that our service is continuous, where incident management is a very important element and to be guardian of the incident management process;
- Be responsible for the technical design, development and maintenance of (parts of) the entire multi-tier web applications of Park-line Aqua (C#, ASP.NET);
- Know everything about the interfaces with various other applications and systems;
- Develop and execute test cases.

You:

- Have a HBO degree in Information Technology;
- Have a minimum of 2 years' experience in web applications for the Microsoft platform and you have the admitted Microsoft Certificates;
- Have experience applying multiple design patterns;
- Have experience/understanding with **SQL**, ASP.NET, C#, JSON, .NET, XML, HTML, XHTML, Javascript & CSS, WCF and REST API's, Windows Services;
- Demonstrate experience and understanding of testing types, including Automation, Functional, End-to-End, and Regression testing;
- Have understanding of scripting languages;

- Have a proven hands-on attitude and are not afraid of rolling up his/her sleeves to get things done and provide the required technical support.
- Are comfortable working in a small team with sharp coworkers with diverse backgrounds and job skills.
- Have a great drive and a flexible and critical personality

We:

- Inspire you be the best version of you;
- Believe in the principle: Work hard, play hard, so we always have fun;
- Have sharp, motivated co-workers in a fun and relaxed office environment;
- Give you the opportunity to make the difference, especially in this combined function.

Of course, you want to know something more about us!

Since 2015 Park-line Aqua uses its proven concepts to focus on the maritime sector. Our specialized software enables municipal and commercial (marinas) ports to digitize their important (customer) processes. By guaranteeing the collection of fees and tolls, operations can yield higher earnings and the service can be customized even further to meet customer demand.

For example, you could digitize and collect the following fees and tolls:

- Port and berthing costs
- Shore side electricity and/or other shore side services
- Lock and bridge tolls
- Permits for permanent berths
- Transit fees
- Waste processing and disposal of waste water
- Bunkering clean water
- Other on-site services
- Anti-theft security for recreational boating

Do you think you are the man or woman for this vacancy and do you think we should drink a cup of coffee with you? Then send us your resume including a motivation to ilse@parklineaqua.nl.
