**NEW AFM-20DSP / AFM-20DSP-AEC**
20-Port Audio Matrix with DSP and Interchangeable Inputs & Outputs

- Multi-channel DSP
- Intuitive configuration & control
- Built-in Power Amp w/ 2x60W @ 8Ω and 1x120W @ 70V / 100V
- HDMI audio embedding and de-embedding
- 4x4 Dante interface

**PA-120Net / PA-240Net**
120W/240W Networked Power Amplifiers

- Line-level output
- 2ch Dante input & stereo line level input
- Built-in DSP
- Controllable via RS-232 and IP

**FC-404Net**
4X4 Dante Interface

- Inputs – 4 line or mic balanced mono
- Outputs – 4 balanced mono
- Volume settings – independent input gain/output volume

**FC-102Net / FC-101Net**
2-Channel / Dante Encoder/Decoder

- PoE acceptor
- Volume control
- Dante IP control matrix & Kramer API

**KN-DSP100**
Kramer Network Powered Server with DSP

- Single-box, plug-and-play solution
- Perfect for large-scale DSP deployments

**Tavor 6-CNet**
6.5” in-ceiling PoE speaker with Dante

- Maximum of 105dBSPL
- Easy, one-click tool-free Installation
- Modern contemporary design
Cutting-Edge End User Control
Kramer Control

With a Kramer touch control panel or any iOS or Android device, Kramer Control gives end users easy, local control of any video and audio system, video streams, video conferencing, lighting, HVAC, shades, and more in any space. Kramer Control’s end user interface is completely customizable.

Unified Management Platform
Kramer Network

Kramer Network makes it easy for IT and AV professionals to manage Kramer’s KDS series streamers, room environments and any AV device from any point on the IP network. Kramer Network delivers a suite of time saving tools including firmware management, centralized or distributed control, automatic device detection, and customizable topology.
Business Benefits of AV over IP

**Built for IT**

Distribute, manage and control any AV, streaming and Dante™ device from any single point in the network. We make it easy for IT professionals to manage AV networks using standard IT practices and existing IP infrastructure with no need to install additional cabling or switches.

**Scalable & Flexible**

Add any number of sources and destinations for any application and grow as you go! Configure any input/output combination for any application, e.g., corporate, education, entertainment, digital signage, medical, military.

**Traditional AV & AV Over IP**

Administrators can easily manage traditional Pro AV and new AV over IP devices from any point in a network. Firmware upgrades, notifications, routing and reporting can all be conveniently managed from a distributed or centralized location regardless of the scale or scope of your installation.

---

**Unlimited Distance**

Your AV distribution and management capabilities are limited only by the reach of your IP network.

---

**Cost Effective - Use Existing Infrastructure**

There’s no need to invest in additional infrastructure, e.g., cabling, switches. The solution also includes built-in scaling and control conversion such as RS-232, IR and USB. Now there’s no need to purchase additional physical control gateways or scalers.

---

**Enhanced Security**

Keep your network safe with the latest user management tools, secured logins and encrypted passwords.
