

HOW TO ACTIVATE

Once your decoder has been installed, completed scanning and channel 100 is playing, you will need to activate it. Please follow these steps:

1

Press the 'HELP' button on your Openview remote control to display the help screen.

2

Write down your STB number.

3

Press 'EXIT' on your remote control to return to channel 100.

4

Dial the number on the bottom right-hand corner using a cellphone and follow the prompts. Use your STB number to complete your decoder activation.

5

Your decoder may reboot and update its software during the activation. Please allow a few minutes for this.

6

Once your decoder has been activated, you can use 'P+' and 'P-' or 'P↑' or 'P↓' buttons on your remote control to change channels.

- Please do not attempt to activate your decoder if you have already attempted to activate it before. It may take up to 5 minutes to view your Openview channels once the decoder has been activated.
