

Oracle Cloud Data Migration Estimate Checklist

Timeline / Expertise

- Skillset and tools
- Conversion timeline
- POD strategy
- Module maturity/experience
- Integration strategy

Data Assessment

- Identify legacy data sources
- Legacy data interviews
- Extraction and centralization of data landscape
- Data profiling reports
- Initial data quality reports

Data Quality

- Data quality/enrichment strategy
- Analysis and quality reports
- Data quality strategy execution

Data Transformation

- Data mapping specifications for each conversion object
- Harmonization/Overlap across data sources
- Transformation programs for each conversion object
- Pre-validation (CTQ) Process

Data Load

- Data loads for all conversion objects and cycles
- Exception resolution across all conversion objects and cycles
- Post load processes

Data Validation

- Reconciliation/Audit requirements (Internal/External)
- Development of reconciliation reports
- Execution of reconciliation process
- Parallel reporting process
- Final validation signoff process

System Retirement

- System retirement requirements
- Execute system retirement

Note: This could be its own project

Additional Factors

- Historical data approach
- Supplemental conversion loads
- Dual maintenance/Interim state processing
- Attachments
- Data team support
- Legacy business and technical resource availability
