

2019 REMOTE PATIENT MONITORING CPT CODES

In 2019, the RPM requirements are significantly improved. CMS added 3 new codes:

99453: Remote monitoring of physiologic parameters like weight, blood pressure, pulseox, respiratory flow rate and others. This code pays for the initial set-up and education on the use of the equipment. Pays \$21

99454: Remote monitoring of physiologic parameters like weight, blood pressure, pulseox, respiratory flow rate and others. This code is for monitoring the daily recording(s) or programmed alert(s) transmission, each 30 days. Pays \$69

99457: Remote physiologic monitoring treatment management services, 20 mins (or more) of clinical staff time in a calendar month requiring interactive communication with the patient/caregiver during the month. Pays \$54
