

Amicis Solutions New Payments Solution Now Available in the Microsoft AppSource

Amicis Payments Empowers Businesses to Simply and Securely Process Payments Within the Microsoft Dynamics 365 Suite

ALPHARETTA, GA
JAN. 14, 2018

Amicis Solutions, the go-to provider of services and support for Microsoft Dynamics 365 and its own best-in-class proprietary solutions designed to help businesses meet and exceed customer expectations, today announced that its Amicis Payments solution is now available in the Microsoft AppSource.

Amicis Payments provides a simple and secure way for businesses to process payments within the Microsoft Dynamics 365 suite. It also manages transactions, as well as provides comprehensive, real-time reports for businesses of any size and across a variety of industries.

Amicis Payments works by extending the Microsoft Dynamics 365 for Finance and Operations enterprise resource planning solution with point-to-point encryption (P2PE), from the point of sale to CardConnect – a First Data company – for payment processing via the CardPointe gateway. CardPointe is a comprehensive platform that includes a powerful reporting and transaction management portal, which extends to a native mobile app. Ultimately, Amicis Payments helps businesses protect sensitive payment data and reduce PCI-DSS scope with the most current and forward-thinking security standards.

“We are excited to offer Microsoft Dynamics 365 users an intuitive and robust tool that will ultimately improve the customer experience,” said Runar Sigurbjartarson, CEO and President, Amicis Solutions. “With Amicis Payments, companies have the ability to search, browse, look-up or scan products, add products to a cart, accept payment, and check out with ease and accuracy.”

As described on the Microsoft AppSource page, key features and functionality of the Amicis Payments with CardConnect solution include:

- Accepts EMV chip-enabled payment cards and major domestic credit, debit and prepaid cards
- Meets EMV card payment receipt requirements – print required tags on card payment receipts
- PCI-compliant – sensitive payment data is protected with P2PE, tokenization and double-encryption of credentials. Data is not stored in the user’s system, reducing the company’s PCI-DSS scope.
- Access the CardPointe portal 24/7 for reporting tools and payment data, and perform actions like voids and refunds in real time

- CardConnect serves as a gateway to virtually all major processors. For a full list, visit ... <http://status.cardconnect.com/>
- CardConnect BOLT P2PE supports various devices including: Ingenico iSMP4, Ingenico iPP320/iPP350, Ingenico iSC Touch 250, Ingenico iCT220/250. For a full list,

About Amicis Solutions

At Amicis Solutions, we believe strong relationships are at the center of any successful technology project. We are dedicated to serving companies in the retail, hospitality and specialty food and beverage industries. Together, our team has decades of experience helping businesses realize their future with the support of leading-edge technology that can be deployed in the cloud, on-premise, or as a hybrid.

We are the go-to provider of services and support for Microsoft Dynamics 365, a best-of-breed combination of ERP and CRM functionality. Our clients in North America rely on us to help them get the most from their Microsoft Dynamics 365 for Finance and Operations and Retail investment. Our suite of best-in-class, fully integrated proprietary solutions are robust yet flexible and easy to use, enabling businesses to meet and exceed customer expectations – all while helping them streamline operations and eliminate unnecessary costs.
