

LLKARC807

Gas Vapour Grills

Arris Gas Vapour Grills are more than just grills; they are a complete, patented grilling system.

They are easy to use and can grill all types of food including meat, fish, vegetables and cheese. Arris Vapour Grills let you grill in an extremely natural and healthy way. This brings out the full flavour and taste of food and promotes the dispersal of fats. The result is dishes that are lighter on the stomach and completely genuine.

Retain flavour
and moisture
in your food.

How does it work?

Water contained in a tray under the grill generates steam that keeps your food softer and juicer, and because any fat dripping from the food falls into the water, Arris Vapour Grills produce far less smoke than conventional grills.

The Gas Vapour Grills are equipped with high efficiency burners which heat special stainless steel profiles that cook food by irradiation, avoiding direct contact with the flame. High grilling temperatures combined with steam from the tray under the grill produces soft, succulent food with superb sensory properties. They are specially designed for grilling thick pieces of meat and can reach temperatures of up to 380-400°C right across the grill top.

Arris Vapour Grills are all supplied on a stand.

How does it work?

Water contained in a tray under the grill generates steam that keeps your food softer and juicier, and because any fat dripping from the food falls into the water, Arris Vapour Grills produce far less smoke than conventional grills. The Electric Vapour Grills can reach temperatures of up to 360°C. Food never comes into direct contact with the heating elements. Instead, food is supported on special stainless steel profiles that protect the elements and guarantee maximum hygiene and food quality. High grilling temperatures combined with steam from the tray under the grill produces soft, succulent food with superb sensory properties. Arris Electric Vapour Grills are also easy to maintain and clean, thanks to clever ideas like a grill top that lifts up for ease of access.

Arris Vapour Grills are all supplied on a stand.

Gas Chargrills

Universo chargrills have been sold in the UK for many years and are reliable, sturdy machines.

The cooking is carried out by shielded burners in tubular stainless steel; these burners heat the lava rock laid on special supports made of heavy duty stainless steel mesh. The frame and combustion chamber are made entirely of heavy gauge stainless steel. The cooking grill is height adjustable by means of two levers at the front and a removable tray collects dripping fat and ash.

We have been selling these units for many years. People who use them, love them!

Gas Fryers

The Elframo gas fryers are manufactured in Italy to the highest standard. They are made entirely of stainless steel and have large diameter supporting feet.

The stainless steel tank has been specifically designed to allow residual particles to fall into a cool zone to avoid burning and to prolong oil life. The tank is lapped directly by the burner flames and crossed by two oversized heat exchangers. With this system, the oil reaches full temperature in only ten to fifteen minutes and the available heat is used to maximum efficiency at the lowest possible cost.

The GF versions' gas controls are completely automatic with piezo-electric ignition. A security valve immediately cuts off the gas supply in the event of any flame failure. The oil in the tank reaches temperature by means of two thermostats with sensing probes, the main one allowing different temperature settings, the second being a safety high limit thermostat with a manual reset button.

There is also a stainless steel oil collecting bin with removable filter and the oil draining tap is positioned just inside the door for easy access.

Anyone who has ever used an Elframo fryer does not want another brand!

Electric Fryers

These electric fryers are available with capacities from 14L to 40L and are equipped with electrical panel and removable armored elements in stainless steel, for easy cleaning of the tank or the maintenance of electromechanical components.

The stainless steel tank has been specifically designed to allow residual particles to fall into a cool zone to avoid burning and to prolong oil life. The tank is moulded without any welding which allows for quick and easy cleaning.

There is also a stainless steel oil collecting bin with removable surface filter and the oil draining tap is positioned just inside the door for easy access. These machines feature an additional safety thermostat with a fixed setting of 220 degrees celsius.

Anyone who has ever used an Elframo fryer does not want another brand!

Pasta Cooker

COUNTER TOP

The Pastachef cooker is a fantastic solution for authentic Italian grab and go food. Using just three simple steps, this machine requires minimal skill whilst producing delicious, authentic Italian pasta!

With the touch of just one button, delicious, hot pasta can be produced within minutes. With a range of sizes and options such as bain maries, the versatile machine has an offering for every occasion. Finished in stainless steel, super easy to clean the Pastachef is very hygienic and user friendly. With water not exceeding 98 degrees, the machine can be safely placed front of house, without restriction. Overall a simple, well built machine producing excellent Italian cuisine, in no time at all.

Delicious pasta
at the touch of a
button!
