# Gas Fryers

The Elframo gas fryers are manufactured in Italy to the highest standard. They are made entirely of stainless steel and have large diameter supporting feet.

The stainless steel tank has been specifically designed to allow residual particles to fall into a cool zone to avoid burning and to prolong oil life. The tank is lapped directly by the burner flames and crossed by two oversized heat exchangers. With this system, the oil reaches full temperature in only ten to fifteen minutes and the available heat is used to maximum efficiency at the lowest possible cost.

The GF versions' gas controls are completely automatic with piezo-electric ignition. A security valve immediately cuts off the gas supply in the event of any flame failure. The oil in the tank reaches temperature by means of two thermostats with sensing probes, the main one allowing different temperature settings, the second being a safety high limit thermostat with a manual reset button.

There is also a stainless steel oil collecting bin with removable filter and the oil draining tap is positioned just inside the door for easy access.

Anyone who has ever used an Elframo fryer does not want another brand!

## Specifications

Model	Dimensions			Basket size			Weight	Power	Oil Tank Capacity	Cooking Output (frozen chips)
	W	D	H	W	D	H				
LLKGT17 Single Tank	400	700	1110	215	375	120	52kg	12 Kw 40,946 btu/hr Nat gas or LPG	21L	18 Kg/hr
LLKG17+17 Twin Tank	700	700	1110	215	375	120	93kg	24 Kw 81,891 btu/hr Nat gas or LPG	21L + 21L	36 Kg/hr
LLKGFS20 Single Tank	400	700	1110	260	280	150	53kg	15 Kw 51,210 btu/hr Nat gas or LPG	21L	22Kg/hr
LLKGFT20 Twin Tank	800	700	1110	260	280	150	94kg	30 Kw 102,420 btu/hr Nat gas or LPG	21L + 21L	44Kg/hr

## Key Features:

- Reaches optimum temperature in 10-15 minutes
- GT model features automatic gas controls
- Electric piezo ignition
- Oil collection bin with removable filter
- Ample cold zone to increase the life of the cooking oil

LLKGFS20

## Suggested Products...
