

Great job offer

CREATIVE TECHNOLOGIST

Now open!

Leva (Chili peppers machines)

We are a team of interaction designers and creative engineers who create unique machines - intelligent mechatronics installations that interact with people and raise our client's brand awareness.

We make people's impressions, emotions and love for the brand lasting forever.

Assignment and activities

You are going to work with the production team to deliver exceptional and unique projects like this one <https://bit.ly/2OKyFn2>.

Working with us means Design Sprint, creative and technical brainstorming, software development, rapid prototyping, manufacturing, new ideas every day, energy and passion.

What we are looking for?

We are looking for a creative technologist, with talent and drive.

We are primarily looking for evidence of good ability and a track record of building things that work.

What you can expect?

Live and work in a challenging environment where we can build everything with the most innovative game engines, computer vision systems, 3D printer and professional CNC - from our electronic skate to a big interactive wall.

Compensation? Yup sure, send me an email to talk about it.

Location

Right in the centre of Turin, Italy (Via Vincenzo Gioberti 18, 10128).

Contact

Contact me to work in one of the fastest growing environments in Italy.

Just send an email to Matteo Mosca - matteo@leva.io.
