Prints on Canvas

Canvas prints differ from standard prints as part of the image is often ‘wrapped around the edge’ of the print. This feature will, in many cases, change the look of the image. We recommend visiting us in the store for the best result if you are not familiar with canvas prints. We offer multiple edge treatment solutions from gallery wrap, mirror wrap, and custom edge.

Custom sizes are available as well as different types of canvas. Canvas prints are typically ready in 5 to 7 days. Below is a list of some of the more common sizes and prices.

Print Scanning

We can digitize loose photos, photos in albums, as well as full photo album pages including handwritten notes.

Our scanning resolution settings are: 600 dpi (dots per inch), 1200 dpi, and 2400 dpi. 600 dpi is for the economy minded, and is best suited for viewing on a computer screen or device.

1200 dpi is our recommended setting as it allows for prints to be made up to two or three times the original size. Basic colour correction, if desired, is included.
