**FOR IMMEDIATE RELEASE**

***King's Seafood Company Discovered Data Security Incident***

**Costa Mesa** – King's Seafood Company discovered data security incident.

King's Seafood Company learned on August 23, 2021, that certain personal information stored in directories within its computer system may have been compromised during a cyber attack in which an unauthorized individual accessed the directories. By having access to the directories, the unauthorized individual was capable of accessing and acquiring the personal information.

The unauthorized individual could have potentially accessed information such as names, driver's license information, payment card information, medical cards, telephone numbers, and partially redacted Social Security numbers.

King's Seafood Company is offering affected individuals identity theft protection services through IDX, which include: CyberScan monitoring, an insurance reimbursement policy, and fully managed ID theft recovery services.

Please call 1-833-992-4007 for assistance or for any additional questions you may have.
