

# URETHANE DUMBBELL

## PRODUCT FEATURES

Our Dumbbells feature solid steel heads with a durable, shock-absorbent urethane plating, fully over-molded to the center.

The heads are welded to a 6" straight hardened chrome handle to create a solid, single piece dumbbell that moves fluidly and compactly.

The combination of the urethane plating and textured finish makes these dumbbells uniquely low-maintenance, looking like new even after long periods of use.

\*DUMBBELL RACK NOT INCLUDED
