Ducted Air Conditioning

Geminair Solutions supply & install ducted air conditioning systems for any size home, new or existing.

Ducted air conditioning provides the perfect solution for those looking to cool their homes without showing off any visible signs. With a fully-integrated system that can be installed in new construction or retrofitted into an existing structure, there's no need to worry about installing complicated equipment inside your house when this type of cooling technology is available outside it.

Ducted Air Conditioners are the perfect way to keep your home cool all summer long. The indoor unit is concealed in a ceiling or floor, with flexible ducting distributing cool or warm air through vents located throughout an entire house. An outdoor unit also helps distribute cooled air from its location outside of any structure.

Geminair's ducted systems can be designed to operate in two or more zones. This means that the air conditioning system can be operated in the living areas during the day and in the bedrooms at night, saving money on energy costs.

Which Ducted System Do I Need For **My Home?**

Ducted air conditioning systems come in various sizes which are suitable for all your heating & cooling needs. Our general size guide is to the right, but if you're still unsure please do not hesitate to contact us with more information - we love nothing better than being able help!

Split System Air Conditioning

Geminair Solutions supply & install split system air conditioning systems for any size room.

Split system air conditioners are an excellent choice for those who want to cool only one room or a small area of their home. With this type of unit, both the indoor and outdoor parts have copper pipes that run between them with wiring attached. These kinds split systems provide great results no matter how much space is being conditioned - from cooking areas all throughout your kitchen up into main living spaces including bedrooms during hot summer Sydney nights.

It can be tough knowing what kind of system will work in your home and it's easy to get overwhelmed with all the options available!

As there's no 'one size fits all' system, our expert team are here to help you select an energy-efficient system for your home. Whether it's one or every room in your home, get in contact today for a free quote.

Geminair's split systems can be installed in just one room or throughout your entire home. We pride ourselves in excellent customer service and ensuring our customers get the best system for their needs everytime!
