

Functional CTRM Consultant

Summary of Responsibilities:

Depending on experience level, it is the job of the functional consultant to lead/assist on Rightangle projects. Functional Consultants are expected to identify new opportunities to implement processes that provide customers maximum efficiency. In addition, this position often works closely with technical consultants and business directors to create customized solutions.

Skill Requirements:

- Knowledge of commodity trading markets and processes (i.e., gas, crude, power, refined products)
- Displays advanced functional understanding of CTRM applications, specifically RightAngle
- Business or System Analyst with implementation, integration and/or support experience in CTRM applications
- Possess above average oral, technical writing and presentation skills
- Previous work experience assisting clients in defining risks, improving or implementing risk management systems and streamlining processes
- Excellent analytical and technical skills
- Ability to work within a team and manage, both short term and long term, projects
- Strong leadership skills
- Capable of rapid learning and self-study

Ideal candidates will possess 3+ years of experience and a Bachelor's Degree in a related field; be highly motivated and capable of working independently; possess exceptional written and verbal communication needed to work/consult with colleagues and business specialists.

Job Location:

- May vary by client (based in Houston, Texas)
- Must be willing to travel

Compensation:

- Starting salary based on experience
- Post-training increase
- Competitive benefits including Healthcare, Vision & Dental insurance and 401(k) Plan
