

Stable Solar independently assessed a range of home solar meter options. Here are our recommendations.

Of the three options, **Emporia** offers the lowest cost and provides basic solar monitoring functionality and reporting. If you're looking for more features, such as integrating your meter with smart home devices, or if you need a stronger wifi signal, **Sense** is a great option and Stable Solar Members receive a \$20 discount off the retail rate.

We only recommend Locus for homeowners who already have Locus and wish to retain cellular connectivity.

			
Price	\$149 <i>Stable Solar Members save 10% (discount applied at checkout)</i>	\$349 <i>\$329 for Stable Solar Members</i>	\$599
Connectivity Protocol	Wi-Fi	Wi-Fi & Bluetooth	Cellular (5 Years)
