

Asking Data Questions

Read the chapter on Data Analysis here: <https://www.digitalfluency.guide/data-supply-chain/analyze>

Then think of an example of big data or little data related to your work. Now, imagine what kind of information or insights you could get by analyzing that data.

*Example: If I analyzed a collection of data about my **typing accuracy and speed cataloged by time of day**, I could **look for patterns in how many errors I make in the morning versus the afternoon**.*

IF I ANALYZED A COLLECTION OF
DATA ABOUT _____,
I COULD _____.
