TOP STORIES

FOX Won First Place In The C.o.R.E.2. Event on Tokemak

This was by far the most exciting story of the month. The event was exciting and nerve wracking for some. The ShapeShift community rallied together to help FOX win first place in the C.o.R.E.2. Event with a total of 8,847,211.454 Votes. The Tokemak reactor is now live and incentivizing single-sided liquidity, you can now stake your FOX at Tokemak [here](#).

We are super excited for this collaboration with one of the best crypto liquidity engines. With the increased incentivization of FOX liquidity that this reactor provides, ShapeShift can continue its mission to build the world's best crypto interface: one that is open-source, self-custodial, multi-chain, and borderless. We add no fees to our users, and we impose no KYC.

Tokemak allows for increased transparency and democratization of liquidity provision, with the goal of becoming the primary vessel through which liquidity can flow freely and efficiently across networks. When staking to a given asset's token reactor, TOKE holders control not only where the liquidity gets directed, but also what markets receive liquidity.

Treasury Management and Diversification Committee

One of the most important proposals which have passed in the last month was the creation of the Treasury Management and Diversification Committee under the Tokenomics Workstream.

This Committee consists of five qualified community members, who are responsible for administering pools the community owns, i.e. adding assets, recommending liquidity incentives etc. The amount of 60,000,000 FOX is proposed to be available to the committee to explore strategies as they see fit.

New Open-Source Web App

The ShapeShift DAO has taken a huge step towards full decentralization by launching the new open-source ShapeShift web app. The Product & Engineering Workstreams soft-launched the new web app at the end of November and invited the community to try it out.

The new web app will be polished further, the teams will continue to improve it, remove any bugs ready for the official launch. This experimental version is called "Alpha" which will include analytics to help the teams track feature adoption and understand the user before migrating to the "Private" version, which will have no analytics or user tracking of any sort.

Creative Services Group

This group will exist within the Product Workstream and will assist in creating content that is aligned with the brand of the ShapeShift DAO through various forms of design related services. The proposal has already passed and the Group will be launching in 2022.

\$1M FOX:RUNE Token Swap

This token swap and joint liquidity pool on THORChain enables decentralized cross-chain swaps for FOX for the first time, opening the door for FOX holders to LP on THORChain. ShapeShift DAO's liquidity position will earn revenues from trade fees and RUNE emissions.

Launch Stable FOX (\$oneFOX)

ShapeShift DAO and ICHI have launched a stable asset called \$oneFOX. This was done to retain more value within the FOX economy. FOX can use its own asset to conduct business or create dollar-denominated exposure/loans in decentralized finance.
