The Operations Workstream works side by side with other workstreams to increase efficiency and help progress the DAO Community and processes.

Weekly Digest

ShapeShift is at ETHDenver this week:

Centralized and decentralized bounties are ongoing and funding 30 Carriers for up to a week. In a decentralized DAO, such as ShapeShift, it is common to continue supporting ETP Carrier through working 30 Carrier to support 30 Carrier. This is a common occurrence in DAO creation.

Proposal to fund the Operations Workstream has passed:

This week's Proposal to fund the Operations Workstream passed. This means we will be able to pay out more to our developer community going forward.

TMCDC Committee to continue past 16 February 2022:

The Treasury Management and Decentralized Capital (TMDC) has reversed its earlier decision to end the TMDC on this date. The TMDC has successful funded and provided support and resources for the past 18 months. Based on the lessons learnt from the TMDC during the trial period, the TMDC will continue to manage the treasury for the long term benefit of the DAO.

Engineering Bounties:

The ShapeShift DAO has many engineering bounties. The most recent bounty was the

Top Stories:

The Treasury Management and Decentralized Capital (TMDC) was established in a lead role by the community during the hackathon. The TMDC has successfully provided support and resources for the past 18 months. Based on the lessons learnt from the TMDC during the trial period, the TMDC will continue to manage the treasury for the long term benefit of the DAO.
