

VIPER GAMING Launches VIPER ELITE II Performance DDR4 Memory

The VIPER™ theme heat spreader brings exceptional reliability and performance potential. Now available in single and dual kit configurations with module densities of 4GB/8GB/16GB/32GB and speeds ranging between 2666MHz and 4000MHz.

FREMONT, CALIFORNIA — June 2nd, 2021 — VIPER™, a trademarked gaming brand of PATRIOT™ and a global leader in performance memory, solid-state drives, and flash storage solutions, today is proud to announce the market launch of their VIPER ELITE II DDR4 PERFORMANCE MEMORY. The VIPER ELITE II inherits its successful design from the award-winning ELITE PERFORMANCE MEMORY series and continues to deliver unparalleled stability and overclocking potential to hardware enthusiasts and hardcore gamers. It is customized for the PC builder looking for an RGB-free performance-centric memory solution with a wide range of speeds and capacities.

"The VIPER ELITE II is a sensible upgrade to our popular and award-winning VIPER ELITE series, and with it, we take everything back to the basics and essentials to how an excellent DRAM module should be built. For the VIPER ELITE II, we have focused on speed, capacity, and stability," said Roger Shinmoto, the Vice President of VIPER™.

"These memory kits offer many options for gamers or content creators who are looking to escalate their system performance to the next level and still maintain a stealthy look inside their PCs."

The VIPER ELITE II features a clean and stealthy new heat spreader design to showcase the VIPER™ brand elements. A military-grade aluminum heatshield wraps up the module to provide outstanding thermal performance and maintain system stability under the heaviest of loads. In addition, each module is built from a 10-layer PCB using only the highest quality hand-tested memory chips and components to ensure that each module meets VIPER™'s strict quality standards for excellent stability and reliability.

The VIPER ELITE II fully supports XMP 2.0 for profile-based automatic overclocking and is validated against the latest Intel and AMD motherboard platforms for compatibility. Backed by a limited lifetime warranty, the VIPER ELITE II is now available in selected global retailers in both single module and dual kits with frequencies of 2666MHz/3200MHz

/3600MHz/4000MHz and module densities of 4GB/8GB/16GB/32GB, offering a maximum kit capacity of 64GB (2x32GB).

FEATURES:

- Product line: VIPER ELITE II
- Edition: Red heatshield with black VIPER™ signatures
- Aluminum heat spreader with the unique and specific design element
- Feature Overclock: XMP 2.0 support for automatic overclocking
- Compatibility: Tested across the latest Intel/AMD platforms for reliably fast performance
- Limited lifetime warranty

Availability

- Amazon US: TBD
- Amazon CA: TBD
- Newegg: TBD
