## 6 – HOW DO WE PROTECT YOUR INFORMATION?

At St. James's Place, we take our responsibility to look after your personal information and privacy seriously. In today's world, we have all seen a growing trend in cybercrime and security breaches. We have a number of security measures in place to help prevent fraud and cybercrime.

6.1 – We have a dedicated group, the "Information Security Oversight Committee", that provides oversight and guidance to our information security and privacy programme.

The executive body responsible for privacy and data security is the Information Security Oversight Committee (ISOC) - chaired by the Chief Technology Officer, a member of the Executive Board. ISOC has a reporting line that enables effective escalation of issues up to the Board where appropriate.

6.2 – We educate and train our employees, Partners and contractors on their information security, fraud prevention and privacy obligations annually.

Our employees, Partners and contractors take part in an annual Information Security training and awareness program and must agree to adhere to the Data Protection Act and our own Information Security Policy that are designed to keep your information safe. These are refreshed each year to reflect the current trends that are being observed across the information security landscape. Information Security awareness also forms part of our new employee induction program. We also educate our employees in identifying potential financial crime and internal fraud; any suspicious activity is reported to our Financial Crime team.

6.3 – When you login, or send us information on the internet we protect the security of this information while it is being transmitted by encrypting it using Secure Sockets Layer (SSL).

When you use your web browser to login, view or share information with us, all electronic information exchanged is encrypted using 2048bit SSL (Secure Sockets Layer) certificate. You are able to identify this by looking for the HTTPS:// and the padlock in the address bar at the top of your browser:

6.4 – We will always interact with you in a safe, secure and consistent manner.

To keep your information secure and to protect our clients from fraud, St. James's Place will only interact with you in the following ways. Tools such as authentication controls, antivirus, firewalls, malware detection and back-up procedures are used across the business. All employee emails and devices are encrypted to enable secure transfer and storage of personal information.

6.6 – We conduct security testing of our applications and services in a controlled testing environment before they are made available for our Clients to use.

We perform security risk assessments for each of our sites to identify and control risks.

6.7 – We have a business resiliency plan with a disaster recovery and business continuity testing.

The purpose of Business Continuity Management and the St. James's Place Business Continuity Plan, is to provide an effective, predefined and documented framework to respond to an incident affecting the Group's activities. The key drivers in developing the business recovery plans are;

- To mitigate the risks that could lead to the significant disruption of our products and services to our Clients.
