

MUNICIPAL WASTEWATER SOLUTIONS

Baswood delivers decentralized wastewater treatment solutions that will take a load off your system and the community.

Key benefits of decentralized treatment with Baswood

- Maintain customer rates / Optimize industrial discharge fees
- Reduce high-strength flows
- Expand treatment capacity
- Avoid costly upgrades to the current municipal treatment plant
- Remove more BOD with less energy

The Baswood BioVore™ System

The Baswood BioVore™ provides cost-effective, reliable municipal wastewater treatment and biosolids/sludge management within a stable, fixed film biological system. Key advantages of the Baswood municipal wastewater solution include:

- Low sludge production / No sludge handling
- Small physical footprint / Minimal land requirement
- No odor concerns
- Low energy use / Cost savings compared to conventional treatment

MUNICIPAL PLANT ENERGY COMPARISON – 150K GPD

BASWOOD'S REVOLUTIONARY APPROACH TO WASTEWATER TREATMENT IS A GAME-CHANGER.

Baswood delivers innovative, technology-based solutions that provide effective wastewater treatment and biosolids management for a wide range of municipal applications.

Baswood's wastewater treatment systems use significantly less energy, physical space, and operator interaction—benefits that deliver sustainable long-term savings compared to traditional solutions.

Industrial and municipal Baswood systems are operating throughout the United States, Latin America, and Asia today.
