## Company Profile:

Axis International Security Services (Ltd) is an International Security Operations Security provider, along with its Security Training Company.

Collectively, the company boasts in excess of 50 years of experience in security, operations risk and business intelligence, corporate and civil investigations and due diligence explorations.

## Mission Statement:

The fundamental mission of the company is to protect the life and property of the customers we serve in a manner consistent with the highest ideals within our industry. We strive towards providing a personalised, quality service whether our clients or customers security concerns are residential or commercial, local or global, large or small; we provide customised solutions to suit all needs, in all situations.

## Philosophy:

We believe not only in providing clients with a safe and secure environment, regardless of their requirements, but also in giving them value for money. Therefore, rather than employ an excessive number of expensive Security Operatives to undertake and oversee a project, we use a required number of highly trained Executive Security Professionals trained & certified by our company.

Undertaking a wide range of risk management capabilities, our personnel have operated in troubled conflicts in:

- Iraq
- Afghanistan
- Africa
- The Balkans
- Europe
- Russian Federation

We are also responsible for security operations in the United Kingdom for high profile clients, and are continuing to do so.

## **Security Industry Approved Contractor (SIA ACS Approved) Ref: AXINSESC01**

When it comes to protecting your buildings, staff and members of the public, you can't put a price on security or on the peace of mind that comes from knowing you've got the best people in the private security industry working for you.

**Clients:**

- Volker Rail

**Working from Within:**

The safety of our client, their assets and operation is always paramount. That is why we invest quality time and effort in working closely with clients and local communities relevant to an area of operation. As an organisation, we make a point of developing a true understanding of local issues and clarifying local and strategic advice before embarking on any project, regardless of the scale of risk involved. We work hard to forge successful partnerships and mutual understandings with communities so that we can provide a personal security solution for foreign and local clients alike.

**Experience and Expertise:**

We comprise of four divisions, with experience and qualifications drawn from UK Forces, Police Force and Security sectors. Each division offers expertise that can be tailor-made to a client's requirements:

- Security Operations
- Technical Security
- Security Training
- Close Protection & VIP Protection

## Service Offerings (in brief):

## Service Offerings (in detail)

### **Risk Assessment & Planning: (Security Survey)**

Risk Analysis Surveys are designed to assess accurately vulnerable areas to individuals, installations and routines and to then recommend suitable solutions for counter measures.

We use the latest methods and technology to produce accurate and up-to-date reports on political, criminal and extremist activity in commercial centres around the world. We utilise the skills learned from our military and Police backgrounds to offer the very best in risk assessment and planning. Our management team, collectively have in excess of 50 years' experience within the security field.

## **Service Offerings (in detail)**

### **Man Guarding:**

We offer a static Level 2 security guard service using only licensed and fully vetted security personnel. The scale of manned guarding assignments and duties is wide ranging and our dedicated and highly trained security staff offer a free consultation service to discuss your company's individual security needs that we then use to create a personal, tailored security package to match your exact requirements.

We understand the increasing pressure on employers to provide a safe environment for employees and customers alike and as such, all our security personnel are highly trained to SIA standards on issues such as conflict management and dispute resolution. In addition to this you will be getting trained security personnel that have further training in First Aid, Fire Marshalling and Traffic Marshalling. All our staff possess CSCS cards, and further qualifications in their relevant field such as specialist Construction and Railway Security (PTS)

### **Service Offerings (in detail)**

#### **Security Mobile Patrolling:**

Mobile Patrols provide a range of services including key holding & Alarm response (both commercial and domestic), mobile patrols.

Our operators can provide you with a Key holding and Alarm Response Service, which can include turning off all unnecessary electrical equipment, securing all windows and fire exits, locking, and alarming the premises.

Our Service provides a complete low cost security solution ensuring stability and continuity of business. The spot checks provided by our mobile patrol service prevent criminal activity, as there is no pattern to when our officers patrol the building. With barcodes placed at agreed inspection points, our operators read these inspection points with their PDAs so a full record of when they patrolled the site is recorded. Our Operators perform regular external and/or internal mobile patrols, and opening and closing premises, as well as attending to alarm activations.

## Service Offerings (in detail)

### Specialists in Utilities and Construction Security

We specialise in Utilities and Construction Security. Since established, we have provided security for many high profile clients within the Utilities and construction industry, completing short and long term tasking catered for our customers' needs. We have vast experience within the utilities and construction security industry and can offer highly skilled, highly trained staff for deployment within these specialist areas.

Over the last 3 years, over £50 million has been lost through theft of assets and other crime within the Utilities industry and we believe that our services will dramatically reduce any losses to clients through crime and other areas whereby work time has been lost.

By having our staff present, it offers peace of mind and added safety to any rail or construction project. We pride ourselves in this and can provide many testimonials of our work from past and current clients. We utilise a number of means when providing rail and construction security. The quality of our staff is paramount and our back to basics approach ensures that all staff is highly trained to the minimum standards required by the Security Industry Authority and beyond.

The experience of our management team and staff ensures that all are converse with current legislation regarding criminal law, utilities and construction guidelines, procedures and policies.

Our staff are also trained to the requirements of any project that would be discussed at the planning stage. All our staff are fully licenced in line with the home office guidelines possess first aid qualifications, CSCS construction cards and are put onto specialised training courses when required. The quality of our staff, knowledge and experience of our management team ensures that any project is delivered to the highest standards and we are always fully prepared for any eventuality.

We also utilise the latest technology to assist our staff which has proven to be extremely successful on previous and current tasks. The following is examples of technology equipment we can implement on any project.

- **Sky Guard-Lone working device** offers extra protection for personnel working alone or on a high value site. This device is directly connected to the 24 hour Control Room ensuring a quick response if required.
- **Body Cameras-** These devices are an invaluable means of intelligence and evidence gathering. They can also act as a deterrent to criminals. We have utilised this facility on past projects and have worked with local authorities to provide evidence gathered leading to successful convictions.

- **Techtronic-** This facility is currently implemented on one of our larger projects and has proven to be a very useful tool when patrolling sites with valuable assets. This equipment is also used by the transport for London throughout their tube stations. Techtronic is a means of logging patrol patterns. Sensors are strategically put around a site commonly in vulnerable areas. When our staff patrol these areas, a fob is touched onto a sensor that logs the time of patrol and is monitored by our operations management team.
- **Medical Training-** we provide specialist first aid training through our training arm of the business. Our fully qualified and experienced instructors have collectively years of front line experience and will deliver an array of bespoke courses catered for any tasking.

We ensure that all necessary precautions are taken and that the most up-to-date situation reports are received and thoroughly examined. Taking into account the nature of our business and the relevant levels of risk at any given time, we believe our fees to be highly competitive.

In addition, to onsite security guarding the above technology solutions are ways in which we utilise technology with our general patrol duties. We have liaisons with Police Services in any area we work and regularly work with authorities to achieve the same common goal of safety and crime reduction/prevention.

### **Professional Fees:**

Fees for any project will always be quoted; on an individual project basis. If you would like more information on our services, the company's expertise and service offerings, please contact:
