your Safari LT.

WELCOME TO THE PRIDE.

The Lion Energy™ journey began in 2001. We started this venture to help people prepare for potential emergencies and become self-reliant. We realized we could help in areas of food, water, lights, and *power*. And our passion for portable power ignited. We wanted to provide the safest, most reliable, silent portable power products and we wanted them to be clean and renewable. Our goal is to create products that are good for people and good for our planet! At Lion Energy, that's exactly what we do.

Lion Energy is built upon the principles of unmatched safety, unwavering reliability, and continual renewability advancements. That foundation, coupled with a promise of excellent customer service, has led to a growing brand with an extremely loyal customer base.

As we forge ahead, the foundations of customer experience, safety, reliability, and innovative renewability remain. We are committed to a continued focus on providing the best emergency preparedness power, portable solar power, and home storage power. Lion Energy is committed to providing our customers peace of mind and the freedom to live life on their terms.

Lion Energy™ Safari LT™ Power Unit Manual

Thank you for choosing the Lion Energy Safari LT™

Welcome to Lion Energy Products

Lion Energy provides portable power that is safe, silent and renewable. Our products are used in emergencies and for work and play. Please read this user manual carefully before using the product.

1. For better performance, fully charge the unit before using it.
2. Do not use as a toy or put fingers or hands into any of the units outlets.
3. Only use recommended accessories.
4. Do not operate the unit with damaged cables or charging adapters.
5. Never attempt to modify or alter unit, cables or accessories.
6. Do not allow this unit to become wet or immerse in water.
7. Do not operate this unit in the presence of flammable liquids, gases or dust.
8. Do not permit the internal battery of this unit to freeze. Never charge a frozen battery.
9. Do not expose or store this unit to excessive heat (>120° F).
10. Storage is room temperature (14° F to 113° F).
11. Charge only at temperatures between 32° F to 115° F.
12. Charge with included chargers or approved solar panel.
13. This product contains lithium ion batteries, please recycle properly.

Package Contents

- Lion Energy Safari LT: 1pc
- User Manual: 1 pc
- Car charge cable: 1pc
- Wall charger adapter (60W): 1pc

1 Parts Identification

	Definition	Description
1	Main Switch	Turns on or off the units display by pressing and holding for several seconds
2	Reset Button	Resets the battery when necessary
3	Wall/Auto Charger	Where the wall and car charger should be plugged into to charge the unit
4	Solar Charging Socket	Where the solar charger should be plugged into to charge the unit
5	LCD	Displays charge/discharge time at the interval of each 0.1 hours
6	Carrying Handle	Used to carry the unit
7	Cigarette Lighter Output Socket	Supplies DC output from the socket
8	AC Output Socket	Supplies AC output from the socket
9	AC Output on/off button	Indicates whether the AC power is on or off
10	DC Output	Supplies DC output from the socket
11	DC Output On/Off Button	Indicates whether the DC power is on or off
12	USB, USB-C and USB-PD Output	Charges USB Device

2 How to Use the Unit

Press the Main Switch for 3 ~ 5 seconds to turn on the unit. The display will light. Then press the DC or AC power button to turn on and supply power to the DC or AC output.

When you stopped discharging from DC or AC output socket, remember to turn off the corresponding on/off button to conserve energy in the Safari LT.

3 How to Charge the Unit

There are three ways to charge the Safari LT:

1. Charge from a solar panel

- Insert the Anderson side of the solar panel charging cable (red and black end) to the solar socket on the front of the unit (red to red and black to black connection). The other end of the solar panel cable should be connected to the solar panel. Solar panel needs to be in direct sunlight.

2. Charge from the wall outlet

- Insert the Anderson into the solar charging port of the unit. Plug the other end of the wall charger into the wall outlet.

3. Charge from a car cigarette lighter (12V) socket

- Insert the Anderson (red/black) end of the cigarette cable (12V) to the Solar / Auto charger input socket on the unit. Plug the cigarette (12V) end of the cable into the car cigarette lighter socket in the car. The car must be running for the cigarette charger to charge the unit.

4 FAQ

Q: What can the Safari LT power?

A: The Safari LT can power several different devices like lights, mobile phones, laptops, and many others. Which devices it can power depends on the energy consumption of each device. The energy consumption is measured in watts (W). The Safari LT can power devices that need a total of 500W or less. It can power multiple devices at the same time if the total power needs of all the devices is 500W or less.

Q: How long can the Safari LT power a device?

A: It depends on the energy consumption or watt usage of the device. The lower the watt consumption, the longer the Safari LT can power it. To determine the estimated run time of the device, use this formula: $\text{Watt Hours} / \text{Watts} = \text{Estimated Run Time}$. For example, if the device you want to power uses 36W and the Safari LT has 450Wh then the estimated run time would be $450 / 36 = 12.5$ hours.

Q: What if I forget to turn off the device after I used it?

A: The Safari LT will turn itself off to conserve energy.

5 Troubleshooting

Q: What if I cannot charge my AC or DC devices when I turned on the Safari LT?

A: Check whether the AC or DC on/off button is turned on or not. Make sure it is turned on. Devices that require more than 500W cannot be charged by the Safari LT.

Q: Why can't I get my Safari LT turned on?

A: If you have not used it for some time, you may need to recharge the Safari LT before you use again. (See section #3 How to Charge the Unit)

Q: What does the Safari LT Display normally show when charging the LT?

A: When charging the Safari LT under DC or AC or strong sunshine, the display will show information such as:

Q: What does the Safari LT Display show while being charged with low or weak sunshine?

A: When you charge the Safari LT with solar panel under very weak sunshine, the display may show:

When the power is recognized to be too weak to charge the Safari LT, the display will be shown as below. This is normal, and you only need to charge with stronger sunshine or by AC power.

6 Battery Safety

Eight-point safety controls system: 1-2 High/Low voltage protection, 3-4 Inverter and battery over temperature protection, 5-6 AC/DC overload protection, 7-8 AC and DC short circuit protection.

7 Mechanical Design (in MM)

8 Charging Speed

Charging Method	Charging time
From Solar Panel	Charging time vary according to the intensity of sunlight
From Wall Charger	6 ~ 10 Hours
From Car Cigarette Socket	3 ~ 5 Hours

NEVER CHARGE THE UNIT UNATTENDED. WARNING! Use only the charger included with the unit to charge. Using any other charger could damage the unit.

9 Technical Specification

AC Charging Input Voltage

1	Input Voltage Range	14.2 ~ 30V
2	Rated Input Voltage	20V
3	Rated Input Current	3A
4	Efficiency	88% Min (@20V DC, Full Load 60W)
5	Overcharge Protection	12.6V

Solar Charging Input Voltage

1	Input Voltage Range	14.2 ~ 30V
2	Rated Input Voltage	18V
3	Rated Input Current	10A (Max)
4	Input Power	110W (140W Max)
5	Overcharge Protection	12.6V

DC Output

1	Output Voltage Range	9V ~ 12.6V
2	Output Current Per Load	5A x 4 (15A Max)
3	Low Voltage Protection	9V
4	Overcurrent Protection	8A x 4
5	Overcharge Protection	12.6V

USB1, USB2, USB3 Output

1	Output Voltage Range	5V
2	Output Current	2.4A (Max)
3	Output Overcurrent Protection	2.7A
4	Output Short Circuit Protection and Disconnection Load Recovery	YES

TYPE C Output (QC3.0 and PD)

1	Output Voltage Range	5V / 9V / 12V / 15V / 20V
2	Output Current	3A / 3A / 3A / 3A / 2.25A
3	Output Overcurrent Protection	3A
4	Output Short Circuit Protection and Disconnect Load Recovery	YES

Cigarette Lighter Output

1	Max Output	12V, 10A
2	DC Output Short Circuit Protection	Disconnect load recovery
3	DC Output Overcurrent Protection	YES (Disconnect load recovery)

Inverter Power Supply

1	Rated DC Input Voltage	12.0VDC
2	Rated Output Voltage/Frequency	120V AC 60HZ / 230V AC 50HZ
3	Rated Output Power	500W
4	Inverter Efficiency	>88% (Max)
5	Output Wave	Pure sine wave
6	THD	<3% (Full R Load)

Environment

1	Working Temperature	32°F - 104°F
2	Storage Temperature	Room Temperature (14°F - 113°F)
3	Operating Humidity	0 - 90%
4	Storage Humidity	0 - 95%
5	Cooling Method	Wind chill

10 Maintenance Instructions

- Charge after each use.
- Use a dry cloth to wipe away any dirt or other debris from the battery cords and outer case.
- Do not open the unit. There are no user-serviceable parts. Any servicing should be performed by factory qualified service personnel.

11 Storage Instructions

- Charge battery to full capacity **before** storage.
- Store this unit at room temperature.
- Never completely discharge the battery.
- For best results, charge at least once every 3 to 6 months if not in frequent use. This will prevent over-discharge of the battery.

WARRANTY REPAIRS OR REPLACEMENTS

For repair or replacement, contact Lion Energy's Customer Service at 1-385-375-8191. Do not return the unit until you receive a return merchandise authorization (RMA) number from Customer Service at Lion Energy. Lion Energy will not be responsible for any shipping or handling damage.

LIMITED WARRANTY

Save proof of purchase, such as a dated receipt, to establish warranty period. Without a dated receipt, we will use the manufacturing date code. This warranty for the unit is extended to the original purchaser or user, and it covers defects in materials and workmanship for one year.

For malfunction due to defects in materials or workmanship prior to six months from the purchase date, we will repair or replace the unit at our discretion after inspection.

Note: The internal battery of this unit is covered under separate terms. The battery will be prorated monthly, over one year, from the end of the first month to the end of the twelfth month. This applies only to batteries which have NOT been misused or abused.

This warranty is invalidated if any of the following occurs, but not limited to:

- Failure to follow the instructions in the User's Manual.
- Accidental or unreasonable use, misuse, mishandling, or normal wear.
- Overcharging or overloading.
- Extended storage without recharging.
- Repairs or modifications by an unauthorized person.

This warranty is in lieu of all other express warranties. Lion Energy will not be liable for consequential or incidental damages.

Address: 735 S. Auto Mall Drive Suite 200, American Fork UTAH 84003

LION SAFARI LT™

IT CAN POWER...

36W
Mini Fridge
12 Hours

5W
Charge Phone
Up to 32x

45W
Laptop Run Time
10 Hours

75W
55" LCD TV
6 Hours

4W
LED Reading Lamp
112 Hours

500W
Hot Plate
50 Minutes

*Run times may vary

MORE POWER TO LOVE...

SOLAR PANEL

Harness the power of the sun and recharge or power your electronic devices. This 100W Foldable Solar Panel comes with a 6' extension cord and a 20-year life expectancy.

CUB GO™

Get more power with the new Lion Cub GO portable power unit. It has 120Wh and 150W output from the Lithium battery source and can be charged from an AC source or by solar.

CUB MS™

The Cub MS will do a lot more than jump start your vehicle, RV, and large boat engine, it will also charge phones, tablets, ham radios or anything that can charge from a USB cable. Recharge the Cub MS from the wall or the 12-volt plug in your car.
