

# Workshop & Equipment Capacities

## Workshop

|                            |  |
|----------------------------|--|
| Fabrication Area:          | 2600 m2                                      |
| Machining Area:            | 1200 m2                                      |
| Storage Yard Area:         | 1.5 Acres                                    |
| Exit Height:               | 7m high, 8m wide                             |
| Overhead Craneage:         | 30 Tonnes                                    |
|                            | 20 Tonnes                                    |
|                            | 7.5 Tonnes                                   |
| External Lifting Capacity: | Up to 120 tonnes within the site boundaries. |

## Machining and Tool Production

Sandersons operate a comprehensive Machining and Tool room service including C.N.C Multi-machining centres. As Precision Engineers, with a fully equipped machine workshop, we can make most spares and carry out repairs in house. We stock a large range of steels and engineering plastics to give fast-turn-around repairs. Our work includes:

- Rotary and Valve Supply, Maintenance and Repairs - tary and Valve Supply, Maintenance and Repairstary and Valve Supply, Maintenance and Repairs
- Specialists in Production Machinery Repairs
- Process plant breakdown, repairs and replacement
- Complete plant and machinery overhauls
- Design and Manufacture of Special Purpose Machines
