

REMOTE WORK OPTIONS

Times like these make it more evident than ever that every business should have a solution in place that allows their employees to work remotely. Businesses that do not have a solution deployed currently are scrambling to find ways to continue operating while allowing their staff to remain safe from the threat of COVID-19.

WCA has options when it comes to the best solution for our customers. If you are looking for the fastest and most flexible option for quickly scaling remote users up or down in times of uncertainty, the Infrastructure-as-a-Service (IaaS) RDS farm option would be ideal. Our Desktop-as-a-Service (DaaS) offering is the high-performance solution that provides the ultimate end-user experience to safely and securely work on any device.

IaaS RDS:

- Provide resources for: Compute (CPU/RAM), Storage, Networking & Licensing
- Deliver access to servers through vCloud Director
- Web-facing management interface for VMware environments
- Deploy virtual machines
- Configure Remote Desktop Services
- Support end-user environment
- 1-3 business days
- Rapid provisioning and deployment
- Highly configurable and flexible
- Multiple remote users per VM
- Secured through SSL/TLS
- Supports 2-Factor Authentication

CLOUD • SERVICES
