

DATASHEET

OILFIELD TUBULARS

SINCE THE EARLY 1990s, JOHN LAWRIE GROUP HAS TRADED IN ALL TYPES OF OILFIELD TUBULARS. THE GROUP PURCHASES AND SUPPLIES NEW AND USED TUBING, CASING, DRILL PIPE AND RELATED PRODUCTS.

SUPPLY

Extensive international experience in supplying new and reconditioned oilfield tubulars has led John Lawrie Group to develop a structure which enables the immediate requirements of its clients to be met. The arrangement of the group also provides clients with the necessary technical and logistical support.

The group offers:

- > An extensive range of new and premium drill pipe, heavy weight drill pipe and drill collars.
- > Direct access to mill sourced casing and tubing, and large stocks of unused, certified casing and tubing.
- > Third party inspection of all material as appropriate.

With operations and stockholdings in the UK, the USA, Canada and Europe, and access to major shipping ports throughout the world, the group is well placed to meet customers requirements.

PURCHASE

As a major purchaser of surplus equipment and pipe packages, John Lawrie Group has developed an enviable reputation for quick decision making, prompt payment and a swift and efficient collection service on a worldwide basis.

Dealing with most of the world's major oil and gas operators and related service companies, its clients have come to recognise John Lawrie Group as one of the leading traders in all types of oilfield tubulars.

The group is a firm advocate of the Circular Economy, which is evident in all the services it provides. This commitment to an environmentally sustainable future led to the company winning the Scottish Environment Business Circular Economy Award in recognition for its achievements.
