

## Dial-n-Dose™ 510 Cartridge

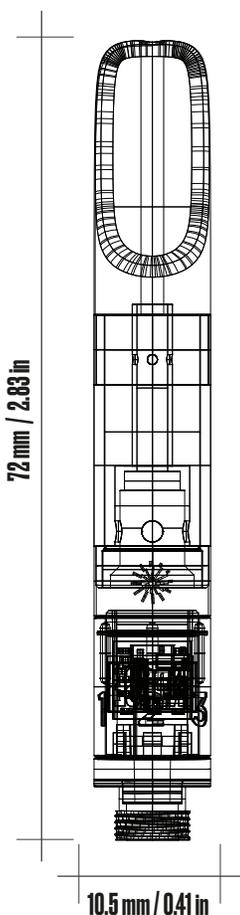

### Indose's Dial-n-Dose™ 510 Cartridge is now taking pre-orders.

The Indose Dial-n-Dose™ 510 cartridge allows consumers to meter the amount of vapor they are inhaling. The cartridge screws into any 510 threaded battery and is super easy-to-use. Consumers just dial their desired number of doses right on the cartridge itself. It incorporates Indose's patent-pending dosing system to provide an affordable dosing solution.

Multiple Patents Pending.

# INDOSE DIAL-N-DOSE™ INDOSE

- Top filling system like standard 510 cartridges
- Device dimensions: 72 mm x 10.5 mm (2.83 in x .41 in)
- Weight: 7g (no oil, no mouthpiece)

## PARTNER WITH INDOSE

Indose works with partners to fill, market and distribute its Dial-n-Dose™ cartridges with medicated vaporizer oils. Indose partners use oils that are extracted from the natural plants or nicotine based oils. The filling system is the same as most standard 510 cartridges. Email [sales@indose.com](mailto:sales@indose.com) to get more info on becoming an Indose partner.

## 510 Compatibility.

Dial-n-Dose™ has a standard 510 thread connection. It can be attached to any battery unit that accepts standard 510's. It requires no special connections or integration.

## Dial-n-Dose™ Technology.

It's fast and simple to use Indose's Dial-n-Dose™ system. Consumers rotate the dial built right into the 510 cartridge to their desired number of doses- 1, 2 or 3. Consumers then inhale as they would from any cartridge. When they complete the dosage amount the device automatically shuts off. A built-in LED light flashes to let the consumer know they have completed their dose.

# FREQUENTLY ASKED QUESTIONS

## How is the Dial-n-Dose™ filled with oil?

Filling information:

- Dial-n-Dose™ uses standard oil filling equipment
- Fills from top
- Needs to be capped with a mouthpiece

## How long does the vaporizer last?

The vaporizer typically contains 1 gram of oil which lasts approximately 800 doses.

## How does the cartridge show me my dose?

Dial-n-Dose™ has a built-in LED light that turns on while a consumer is taking their dose and flashes when they are complete.

## When will the Dial-n-Dose™ be available?

The Indose device will be available in Summer 2020. Indose is taking pre-orders now.

## What differentiates Dial-n-Dose™ from its competitors?

Dial-n-Dose™ provides consumers with an easy and affordable dosing solution using a standard 510 cartridge. We don't know of any other products that offer that.

## What are the packaging options for partners?

Dial-n-Dose™ is approximately the same size as a standard 1 gram 510 cartridge. Therefore the packaging options are standard packaging offered by many packaging companies.
