What training, experience, and background make you the best qualified candidate to be your party's nominee for this office?

Houston's most significant industries, energy and health care, are controlled in Washington by Federal legislation, budgets and administrative regulation. My Business Leadership (National Director, Price Waterhouse and Maxxam --Fortune 500), Public Leadership (turning around two large public agencies in Washington and Houston), and Political/Policy Leadership (taxpayer advocacy, community organizations, political campaigns, etc.) are unique: I am the only candidate with proven leadership in business and government –locally, nationally and globally.

485/556

What are the two most pressing issues you will face if elected? Describe your specific plans/ideas for addressing these issues.

The most pressing issues will be defending Houston's most significant industries, energy and health care, from the Democratic assault and promoting their future growth:

Houston Industry

Energy: Fossil Fuels

Health Care:

Texas Medical Center

Defending against

The Green New Deal

Medicare for All

Promoting Solutions

Oil & LNG Exports

Market-based competition,

Innovation & cost control.

I will do so by bringing unique business experience to Congress to: align Washington's interests with Houston's realities; lead by example; and hold government accountable.
