This month we focus on aligning multiple initiatives to enhance outcomes and drive efficiency and effectiveness. We have three featured videos focusing on an introduction to an Interconnected Systems Framework. The first video focuses on an introduction to ISF. The second video (which auto starts) focuses on integrating trauma-informed approaches within MTSS, and the last video focuses on restorative practices in PBIS. The slide deck for trauma-informed approaches can be found here.

The ISF involves deliberate application of the multi-tiered PBIS Framework for all social/emotional/behavioral (S/E/B) interventions (e.g. mental health, social emotional learning, trauma-informed practices, bully prevention, etc.), aligning all related initiatives through one system and the district and school level. The investment in integrated into one interconnected system of mental health and PBIS, included S/E/B efforts, will be organized and directed from the district/community level with coaching support provided to the schools.
