Norwood's Response to Covid-19
Norwood's is investing in the safety of wonderful guests, team mem-
bers and support staff. After a careful search for the best sanitizing,
cleaning, and disinfectants we found saltwater biocides.
The saltwater biocides on
site generation machine produces Hypochlorous acid (HOCL)
which is a less toxic option for sanitizing and
disinfecting. This green technology is EPA and FDA approved.
Norwood's Sustainability Initiatives
-"Garbage to Garden" includes diverting preconsumer food waste
from landfills to composted soil, used in our raised garden bed.
-Reusing waste, including sweet tea for brining, pulp from juicing
fruits, and replanting green onion stalks in our garden.
-Waste Reduction includes eliminating many single use plastic
utensils in favor of compostable eco products.
-Purchasing produce, chickens, eggs, bread, and honey from <u>local</u>
farmers & bakers
