

iShareMax

Simple and secure file sharing with digital signature capability

iShareMax is an electronic document sharing platform which seamlessly integrates with your DMS and CRM systems - making it easy to send and receive important sales and aftersales documentation with the ability to collect customer signatures digitally.

Contact-Free

By conducting all communications digitally, customers can receive, sign and return all key paperwork from their own homes – minimising all non-essential travel and simplifying the completion and authorisation of sales or aftersales processes.

100% Secure

All customers must successfully complete a two-step verification process to be able to download, upload and digitally-sign documents on any device. We also track every action and keep you notified via email every step of the way.

Highly Flexible

All emails and documents are fully customisable with the ability to upload any PDF document to the system. All key functionality is available to your entire organisation, making it the perfect tool for both retail and service departments.

Robust & Reliable

iShareMax is built on the same robust system architecture as our award-winning iDealFile and iServiceFile products so you can rely on maximum uptime, fast processing speeds and highly efficient workflows at all times.

Find out more

To find out how we can help you implement remote document sharing and customer authorisation in your organisation, call us on +44 (0) 1635 905985 or email sales@motordocs.co.uk
