Argan Oil – Nourishing			842P	5 x 40 g

Benefits:

- Specially formulated for the mature, lipid-depleted skin
- Softens tight skin and reduces wrinkles
- Supports the natural barrier function of the skin
- Protects against free radicals and premature aging of the skin
- Doesn't feel tight during application time
- Oriental citrus fragrance
- Innovative preparation in a shaker
- Paraben free

This lipid-releasing, alginate-based peel-off mask with sea fennel, Thali'source, hyaluronic acid and argan oil is an anti-aging peel-off mask for mature, lipid-depleted skin. It has been proven to strengthen the functions that are important for cell renewal and to ensure firmer skin and fewer wrinkles.

The Argan Oil Peel Off Mask has an ultra-nourishing gel base, which gives mature skin a pleasantly rich skin feel.

An extract of sea fennel keeps the skin soft and firm, while strengthening its barrier function. Short-chain hyaluronic acid provides intensive moisture. Argan oil provides the skin with valuable fatty acids, supports the skin's natural hydro-lipid film, and protects against free radicals.

The mask application is very simple: It only takes five seconds to make the active ingredient paste a perfectly smooth texture with the addition of drinking water. The mask can be applied in a single thick layer and forms a rich film that adheres very well to the skin. Its fast-setting texture allows the mask to remain on the skin for 15 to 20 minutes without tensing. This leaves time for a hand or head massage.

Thereafter, the mask can be removed like a second skin. It leaves a visibly smoothed skin surface and a silky complexion.

ACTIVE INGREDIENTS

- **Alginate:** Gives the powder mask an elastic, firm consistency after mixing and drying. Alginate is moisturising, firming, and lifting
- **Sea fennel (Crithmum maritimum):** A perennial coastal plant rich in fatty acids and minerals, which keeps the skin soft and firm while maintaining the elasticity and cohesion of the skin's layers
- **Thali'source:** Extracted from brown algae, rich in oligosaccharides, to improve the moisture content of the skin
- **Short-chain hyaluronic acid:** Moisturizing and preserving
- **Argan oil:** Obtained from the fruits of the argan tree; rich in unsaturated fatty acids and anti-oxidative vitamin E; supports the skin's natural hydro-lipid film; protects against free radicals

Application

Step 1: Protect the customer's hairline (e.g. with cellulose cloths).

Step 2: Apply the active ingredient concentrate corresponding to the skin type to the skin areas to be treated and gently pat in. Allow to soak for a few minutes.

Step 3: Stir the Peel Off mask. Shake the active ingredient paste with approx. 90 - 100 ml drinking water in the innovative shaker for approx. 20 sec. This will create a uniform, homogeneous mass.

Step 4: Apply the viscous mask mixture with a spatula in upward strokes evenly on the face and neck or the corresponding parts of the body. Avoid eyes and mouth (if necessary, incorporate after consultation with the customer). Of course, the airways should always be kept free. Time: 15-20 Minutes.

Step 5: Simply peel off the mask and, if necessary, any remove residue with a moist sponge.

Step 6: Then apply appropriate care cream.

Note: As the mask constricts thin areas may lead to powdery residue on the skin. To avoid this, simply apply some nourishing cream along the mask edges at the neck, hairline, and nostrils.

TREATMENT IN BEAUTY SALONS

TREATMENT PROCEDURE	PRODUCTS	REF.
Purification	• Multi Action Cleansing Balm	• 1100P
Refreshing	• Micellar Skin Tonic	• 1101P
Eye care Eye care (depending on skin sensitivity, can be used optionally as protective care before exfoliation)	• Tri-Care Eye Cream	• 1160P
