

# IRRESISTIBLE EYE ELIXIR

## EYE CARE SERUM ROLL-ON WITH IMMEDIATE EFFECT

Irresistible Eye Elixir is a must-have for tired, swollen eyes. The silky elixir comes in a practical roll-on format and refreshes the skin, provides it with intensive moisture and ensures that you are always looking awake and alert. The cooling massage ball massages the eye area, stimulates micro-circulation, thereby reducing puffiness.

Irresistible Eye Elixir combines long-chain hyaluronic acid and glycerine that immediately hydrate and revitalise the skin. The caffeine it contains supports this effect and gives tired eyes a fresh wake-up call.

When used over a long period of time, Matrixyl™3000, a peptide complex, stimulates the synthesis of collagen and hyaluronic acid, helps smooth wrinkles and improves the elasticity and resilience of the skin.

Silk acacia extract protects and repairs the microcapillary system in the sensitive area around the eyes, helping to reduce dark circles under the eyes and fight signs of fatigue.

Irresistible Eye Elixir is the perfect synergy of silky, fast-absorbing serum texture and cooling roll-on application. The result? A radiantly fresh, smoother and firmer eye area.

### ACTIVE INGREDIENTS

- **Long-chain hyaluronic acid:** Hyaluronic acid has the exceptional ability to absorb and store large amounts of water and therefore plays an important role in making sure the skin stays at an optimum moisture level
- **Matrixyl™3000:** The anti-wrinkle peptide mixture, contains special messenger peptides (matrikins), which play a vital role in the skin's own repair processes. These peptides activate the new synthesis of the extracellular matrix components of the skin, such as hyaluronic acid and collagen, and ensure a measurable anti-wrinkle effect in the area around the eyes
- **Silk acacia extract:** Reduces signs of tiredness on the skin; reduces dark circles and bags under the eyes
- **Caffeine:** Provides a fresh wake-up call for the eye area, stimulates micro-circulation and counteracts puffiness
- **Glycerine:** Moisturises the skin and reduces wrinkles caused by dryness; promotes the elasticity of the skin

### APPLICATION

Apply the roll-on product from the inner corner of the eye outward using light pressure 2-3 times. You may need to tap it in lightly with your fingertips. Extra tip: Keep the roll-on product in the fridge. This increases the cooling, decongestant effect.

### BENEFITS:

- Revitalises the tired eye area
- Reduces puffiness
- Provides intense moisture
- Smooths wrinkles
- Leaves the eye area looking radiant
- Ideal for use on-the-go and when
- Non-greasy
