

# MESSAGE FLEECE

**ALGinate FLEECE FOR PROFESSIONAL APPLICATION IN THE BEAUTY SALON**

PRODUCT	REFERENCE NUMBER PROFESSIONAL	CONTENT PROFESSIONAL
Pure	8301.901	1 set

**MESSAGE FLEECE Pure** is a velour-like biomatrix on an algae basis. Following the addition of fluid, the practical individual application (1 set) is transformed into a slippery gel for facial massage.

The structure of the natural biomatrix is similar to that of a sponge. The fine latticework consisting of polysaccharides originates from the freeze-dried derivatives of the brown algae and phytosqualane. The extraordinary MESSAGE FLEECE convinces in its dual function of active substance and active substance carrier at the same time. It serves to intensively moisturize the skin. The plate-like structure of the biomatrix is particularly absorptive for additional active substances.

After being prepared, MESSAGE FLEECE is a natural, particularly skin-tolerable and effective massage gel. It is created by adding fluid (e.g. ampoules). Only then is the biomatrix dissolved and transformed into the slippery gel with its beneficial properties.

MESSAGE FLEECE is lipid-free, cooling, odorless and easily distributed. The product-specific active substances are mobilized during the massage and are released particularly quickly and efficiently.

MESSAGE FLEECE is especially skin-friendly. The patented production process of freeze drying enables preservatives, fragrances and chemical networking agents to be omitted entirely.

MESSAGE FLEECE has an unsurpassed effect: the skin is left looking increasingly fresh, smooth and supple after every massage.

## MESSAGE FLEECE FOR PROFESSIONAL APPLICATION

MESSAGE FLEECE leads to variety in the beauty salon. Particularly in combination with Mask Activator and/or an ampoule fluid from the AMPOULES series, for example, this unique fleece is an unbeatable treatment unit and transforms each massage into an effective and tangible experience.

Application is simplicity itself and can be undertaken in two ways:

### APPLICATION

#### Preparation directly on the skin

1. Cleanse the skin and moisten it with tonic.
2. Open the sealed packaging of a MESSAGE FLEECE set and remove all of the precut forms. Place the individual precut forms onto the corresponding areas of the face with dry hands.
3. Generously apply the prepared activator fluid\* (Mask Activator and/or ampoule) onto the individual precut forms using a fan brush. The MESSAGE FLEECE is transformed into a transparent and smooth hydro gel.
4. Distribute the hydro gel evenly over the skin and massage in gently for approx. 10-20 minutes. Whilst doing so, constantly remoisten the hands with activator fluid\*\*.
5. On completion of the massage, remove the remaining gel residues with warm compresses. Thoroughly cleanse the hairline and eyebrows. Continue the treatment according to the skin type.

#### Preparation in the mask bowl

1. Cleanse the skin and moisten it with tonic.
2. Open the sealed packaging of a MESSAGE FLEECE set and remove all of the precut forms. Tear a MESSAGE FLEECE set's precut forms\* apart using dry hands and place them into a mask bowl.
3. Add activator fluid\* (Mask Activator and/or ampoule) and mix until a transparent and smooth hydro gel occurs.
4. Distribute the hydro gel over the face using a fan brush and then massage gently for approx. 10-20 minutes as usual. Whilst doing so, constantly remoisten the hands with activator fluid\*\*.
5. On completion of the massage, remove the remaining gel residues with warm compresses. Thoroughly cleanse the hairline and eyebrows. Continue the treatment according to the skin type.

Enlargement as seen through an electron microscope  
Agrandissement au microscope électronique

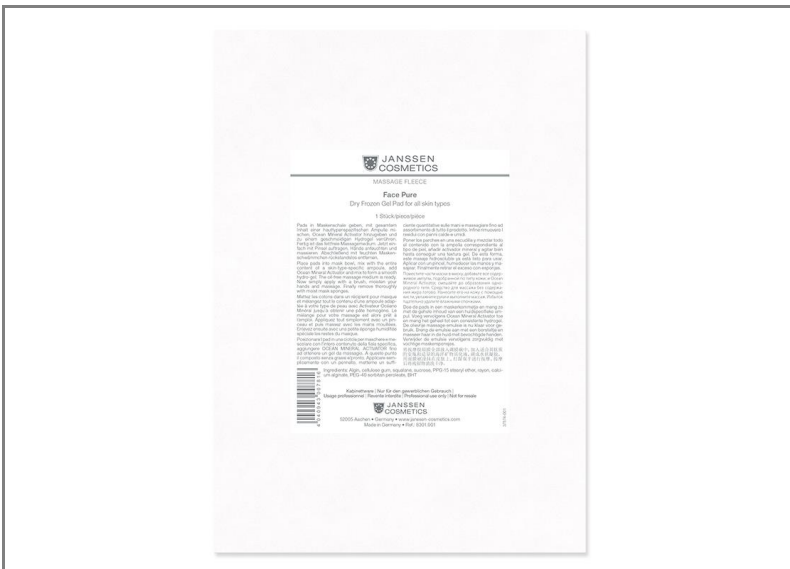

\* The activator fluid should not be applied too sparingly; only then is a smooth massage gel able to occur. Experience has shown that a total of approx. 10-15 ml fluid/set is optimum.

\*\* **Tip:** A vaporization unit can also be used as support for continuous moisturization during the massage.

## MESSAGE FLEECE

- **Ideal for lipid-free massage**
- **Extremely moisturizing and moisture-retaining**
- **Skin-smoothing**
- **Increases the skin's suppleness**
- **Reduces wrinkles caused by dryness**
- **Contains no preservatives or fragrances**

### Pure

#### MESSAGE FLEECE FOR ALL SKIN TYPES

MESSAGE FLEECE Pure is a freeze-dried, white biomatrix based on highly-concentrated algae derivatives (polysaccharides).

When fluid is added, the biomatrix dissolves to form a wonderfully spreadable and slippery massage medium.

MESSAGE FLEECE Pure is an adaptable massage gel for all skin types. Only the addition of an ampoule fluid transforms it into a specialist and specifically cares for all types of skin depending on appearance. The skin immediately regains lost moisture, whilst the active substances contained in the ampoule concentrate contribute towards improving it.

MESSAGE FLEECE Pure has a caring, smoothing and softening effect which can be immediately seen and felt.

#### Application

The treatment can be continued with a cream mask and/or concluding care.

#### Note:

*MESSAGE FLEECE Pure consists of a set with 5 precut forms (2x cheeks, 1x forehead, chin and neck).*

*Until applied, always store the set in the sealed packaging at room temperature; protect against moisture and exposure to direct sunlight.*

**Tip:** *Ideal for all customers who dislike oils and lipids during a massage and the typical residues afterwards.*

#### ACTIVE SUBSTANCES

- **Alginate:** Alginic acid salts obtained from brown algae. Its particularly high swelling properties lead to good gelling and spreading capability. Has an intensively moisturizing and moisture retaining effect
- **Squalane:** Hydrate from the unsaponifiable part of olives; its characteristics are similar to those of the skin's lipid, ensuring that it is particularly well absorbed by the skin; cares for the skin, leaving it soft and velvety
