

PEELING MASKS

READY-TO-USE PEELING MASKS FOR PROFESSIONAL APPLICATION IN THE BEAUTY SALON

PRODUCT	REFERENCE NUMBER PROFESSIONAL	CONTENT PROFESSIONAL
Enzyme Peeling Mask	7807P	300 g
Thermo Peel Mask Cranberry	7570P	300 g

PEELING MASKS have been developed specifically for cosmetic treatment in the beauty salon. They are usually applied directly after cleansing the skin and serve to deep cleanse the skin.

They are optimally suitable for integration into treatment sequences but may also be offered and used separately as individual treatments. Subsequently applied active substance products such as e.g. ampoule concentrates are absorbed more readily by the skin, and their effect is enhanced.

The peeling masks are based on purely natural ingredients in highly-concentrated form, and lead to visible and perceptible effects following each individual application.

The following peeling masks and beauty salon products are available:

PEELING MASKS

- **Intensive and thorough skin cleansing**
- **Dead skin cells are dissolved and removed**
- **Surplus lipids are absorbed**
- **The skin's structure is left looking fine and smooth**
- **The skin is optimally prepared for subsequent treatments**

Enzyme Peeling Mask

DEEP-CLEANSING ENZYME PEELING FOR ALL SKIN TYPES

Enzyme peeling – this refers to biological peeling on the basis of natural enzymes which digest protein and lipids. These enzymes are integrated into an alumina basis.

With the aid of the Enzyme Peeling Mask, the cement substance between the horny lamellae, the keratin of the horny layer itself, is dissolved. At the same time, the enzymes also penetrate between the blackhead plug and the follicle wall, thereby partially loosening or dissolving the sebum and horny mixture. As a result of this, skin impurities are effectively prevented or removed, the skin profile is refined and the skin is optimally prepared for the subsequent treatment.

Enzyme Peeling Mask is suitable for both the facial and the body's skin, e.g. stressed backs of the hands and impure areas of the back.

Application

Mix powder with Mask Activator to form a smooth paste. Thickly apply the mixture onto the face, neck and neckline with a spatula and massage in briefly. Leave out the eye area. Allow the mask to work in for 10-20 minutes under vaporization or moist, warm compresses. Then massage again briefly with the fingertips or the brush massage device (if the skin type permits). Finally, thoroughly remove residues with mask sponges.

Note regarding quantity: Approx. 1-2 heaped tsp. powder for the face and neck.

Approx. 4-6 heaped tsp. powder for the back area.

ACTIVE SUBSTANCES

- **Kaolin:** Porcelain clay, absorbs surplus lipids, ensures a clear, mat complexion
- **Papain:** Papaya fruit enzyme, enzymatically dissolves dead skin cells
- **Bromelain:** Pineapple enzyme, enzymatically dissolves and removes dead skin cells

PEELING MASKS

- **Removes dead skin cells from the skin of surface of the skin**
- **Combats premature skin aging**
- **Increases skin moisture**
- **Smooths the complexion**
- **Clarifies even skin profiles which have a tendency towards impurities**
- **Supports the skin's native regeneration process**
- **Imparts a particularly cosy sense of warmth**

Thermo Peel Mask Cranberry

SELF-HEATING PEELING MASK FOR SKIN REGENERATION

Thermo Peel Mask Cranberry is an agrillaceous earth-based, skin-smoothing mask enriched with the dried and crushed components of cranberries. Peeling and care mask go “hand-in-hand” in this product. This takes place under special physical circumstances: On application, Thermo Peel Mask Cranberry has a perceptible warming effect. With a temporary “hot flash”, application of this product is a very special experience!

The crushed cranberry seeds and skins offer an outstanding exfoliation medium, whilst the microfine powder comprised of dried cranberries is the ideal form for presenting all of its biologically active substances. Even the fruity, fresh fragrance is naturally retained.

Application

Distribute Thermo Peel Mask Cranberry over the skin in the same way as a pack, and massage in with the fingertips. After “peeling” for approx. 3 minutes, allow the creamy paste to remain on the skin for a further 5-10 minutes in the same manner as a care pack.

ACTIVE SUBSTANCES

- **Kaolin:** Absorbent, healing earth
- **Panthenol:** Soothes the skin and regenerates
- **Cranberry extract:** Rich in polyphenols and tocotrienols, providing its extraordinary potency as a radical scavenger; the omega 3 & 6 content (unsaturated fatty acids) protects the skin's moisture retention capacity, its antimicrobial properties combat impurities
- **Cranberry granulate:** Exfoliation medium
- **Grape seed oil:** Smooths and lifts the skin, regenerates
- **Zeolith:** Hydrated, crystalline aluminosilicates (consisting of aluminum oxide and silica), which occur as by-products of volcanic rocks as a result of hydrothermal changes. Generates a temporary thermal effect on the skin
